NEW QUESTION 56

An Okta Administrator ran a full import from Active Directory An expected group was NOT imported into OKta. Is this a reason

why the group was NOT imported into Okta?

Solution: The organizational unit (OU) containing the group was NOT selected for Import

- * Yes
- * No

NEW QUESTION 57

An employee who has left a company used an application that does NOT support lifecycle management. Is this a task generated by Okta to remind the administrator to offboard the employee?

Solution: Deprovisioning task

- * Yes
- * No

Explanation

Employee leaves an organization

As employees leave an organization, a process can be initiated by various departments to deactivate users. The user account needs to be deactivated. Deprovisioning deactivates the user account from the Okta Universal Directory. Deprovisioning ensures that persons who are no longer in your organization do not have access to sensitive applications and data.

You can deprovision users in Okta or from an external user store, such as AD or a CRM app, such as Salesforce. Typically, user deactivation is triggered from an external user store and it flows into Okta. In any case, deactivated users are automatically deprovisioned from supported apps. Admins receive an email describing any apps that require them to manually deprovision from users.

- * Yes
- * No

Explanation

<https://developer.okta.com/docs/guides/build-sso-integration/saml2/overview/>

NEW QUESTION 64

Does this Okta agent support provisioning?

Solution: Active Directory Agent

- * Yes
- * No

Explanation

https://support.okta.com/help/s/article/Provisioning-Concepts-and-Methods?language=en_US Agent-based Provisioning

* An agent (windows service, linux daemon) installed to the local environment brokers Provisioning transaction requests between Okta and the on-premise resource.

* Currently Supported Provisioning agents

* Active Directory

* LDAP

* On Premise Provisioning

* This agent is generic and intended to connect to any On-Prem resource that can use the SCIM (Secure Cross-domain Identity Management) language.

* This typically involves code and a Professional Services Statement Of Work

* For more information, consult our On Premises Provisioning Deployment Guide

* This is a good, robust strategy. However, it is limited to on-premise applications.

NEW QUESTION 65

An administrator needs to limit multifactor authentication (MFA) factor type enrollment to end users located in a corporate office. Is this the feature that the administrator should use to set the corporate office perimeter?

Solution: Password policy

* Yes

* No

NEW QUESTION 71

Is this a true statement about Okta mastered users?

Solution: Okta mastered users authenticate against an Okta password policy

- * Yes
- * No

NEW QUESTION 72

Is this a true statement about deleting Okta user accounts?

Solution: After an account is deleted, an administrator can reuse the deleted user name.

- * Yes
- * No

Explanation

Permanently delete an end user account

You can permanently delete a deactivated user with the Delete button that appears in the directory screen for that user. You cannot undo this deletion. After the deletion, the user is not visible on the People page and is not returned in API responses. However, any log entries that reference the user are maintained. After deletion you can reuse the user name and other identifiers.
