NO.11 You have just started working at a large organization. You have been asked to sign a code of conduct as well as a contract. What does the organization wish to achieve with this?

- * A code of conduct helps to prevent the misuse of IT facilities.
- * A code of conduct is a legal obligation that organizations have to meet.
- * A code of conduct prevents a virus outbreak.
- * A code of conduct gives staff guidance on how to report suspected misuses of IT facilities.

NO.12 Companies use 27002 for compliance for which of the following reasons:

- * A structured program that helps with security and compliance
- * Explicit requirements for all regulations
- * Compliance with ISO 27002 is sufficient to comply with all regulations

NO.13 Who is authorized to change the classification of a document?

- * The author of the document

- * The administrator of the document
- * The owner of the document
- * The manager of the owner of the document

NO.14 What is the objective of classifying information?

- * Authorizing the use of an information system
- * Creating a label that indicates how confidential the information is
- * Defining different levels of sensitivity into which information may be arranged
- * Displaying on the document who is permitted access

NO.15 You apply for a position in another company and get the job. Along with your contract, you are asked to sign a code of conduct. What is a code of conduct?

- * A code of conduct specifies how employees are expected to conduct themselves and is the same for all companies.
- * A code of conduct is a standard part of a labor contract.
- * A code of conduct differs from company to company and specifies, among other things, the rules of behavior with regard to the usage of information systems.

NO.16 What is an example of a non-human threat to the physical environment?

- * Fraudulent transaction
- * Corrupted file
- * Storm
- * Virus

NO.17 What sort of security does a Public Key Infrastructure (PKI) offer?

- * It provides digital certificates that can be used to digitally sign documents. Such signatures irrefutably determine from whom a document was sent.
- * Having a PKI shows customers that a web-based business is secure.
- * By providing agreements, procedures and an organization structure, a PKI defines which person or which system belongs to which specific public key.
- * A PKI ensures that backups of company data are made on a regular basis.

NO.18 Which of the following measures is a preventive measure?

- * Installing a logging system that enables changes in a system to be recognized
- * Shutting down all internet traffic after a hacker has gained access to the company systems
- * Putting sensitive information in a safe
- * Classifying a risk as acceptable because the cost of addressing the threat is higher than the value of the information at risk

NO.19 What is an example of a good physical security measure?

- * All employees and visitors carry an access pass.
- * Printers that are defective or have been replaced are immediately removed and given away as garbage for recycling.
- * Maintenance staff can be given quick and unimpeded access to the server area in the event of disaster.

NO.20 What is the best description of a risk analysis?

- * A risk analysis is a method of mapping risks without looking at company processes.
- * A risk analysis helps to estimate the risks and develop the appropriate security measures.
- * A risk analysis calculates the exact financial consequences of damages.

NO.21 What is the best way to comply with legislation and regulations for personal data protection?

- * Performing a threat analysis
- * Maintaining an incident register

- * Performing a vulnerability analysis
- * Appointing the responsibility to someone

NO.22 You are the owner of the courier company Speedelivery. You have carried out a risk analysis and now want to determine your risk strategy. You decide to take measures for the large risks but not for the small risks. What is this risk strategy called?

- * Risk bearing
- * Risk avoiding
- * Risk neutral
- * Risk passing
