#### NEW QUESTION 42

A developer needs to configure a new installation product that will not be charged to customers. The developer creates the product using the installation object type and adds a product code MODEM5G-INST. To simplify configuration, the developer does not configure a price. The developer sets the selling Start Date to 1 month from now.

To test the new product, the developer configures an order in the Cart and selects the default price list. The developer searches the products list, but the new product does not appear.

What is causing this issue?

- \* The product code contains a non-alphanumeric character (-).
- \* The developer did not configure a price.
- \* The Selling Start Date price is in the future.
- \* The developer did not run Refresh Platform Cache.

#### NEW QUESTION 43
