Verified 2V0-31.21 Exam Dumps PDF [2022] Access using Test4Engine

Try Best 2V0-31.21 Exam Questions from Training Expert Test4Engine

VMware 2V0-31.21 Exam Syllabus Topics:

TopicDetailsTopic 1- Configure Code Stream Endpoints and Basic Pipelines- Perform a simple installation using vRealize Easy InstallerTopic 2- Describe the architecture of vRealize Automation- Differentiate between vRealize Automation vs vRealize Automation cloudTopic 3- Troubleshoot vRealize Automation configuration errors (Cloud Zone, tags, YAML, etc.)- Monitor vRO workflow execution (extensibility and event logs)Topic 4- Integrate vRealize Automation with vRealize Operations- Describe different types of basic integrations available with vRealize AutomationTopic 5- Install SaltStack Config using vRealize Suite Lifecycle Manager- Perform manual installation using Lifecycle Manager (Workspace ONE Access and vRealize Automation and vRA Envrion Scale Out)Topic 6- Customize a deployment using CloudConfig- Cloud-InIt- Describe the services offered by vRealize AutomationTopic 7- Describe Different Types of Tags in vRealize Automation- Prepare the pre-requisites for the installation (DNS, NTP, Service Accounts etc.)Topic 8- Manage Capability and Constraint Tags- Manage the Identity and Access Management tab

QUESTION 26

What capability enables provider administrators to allocate infrastructure resources to tenants in a multi-organization vRealize Automation environment? (Choose the best answer.)

* Virtual Private Zones
* Virtual Private Clouds
* Cloud Accounts
* Integration Endpoints

QUESTION 27

An administrator configures cloud accounts for vSphere, Amazon Web Services and Google Cloud Platform. Each public cloud account has a single region configured, with a single cloud zone associated with each. Company policy states that all development workloads should be deployed to the public cloud and all production workloads should be deployed to vSphere. The administrator wants to ensure that when creating cloud templates for this project an appropriate constraint tag is specified to meet the placement policy and that App-Dev users are allowed to select whether to deploy the machine to production or development. The tagging strategy states that development environments should be tagged with “dev” and production environments should be tagged “prod”.

Which two actions should the administrator take to ensure the objective is met? (Choose two.)

* Add a capability tag to each cloud account, using env:prod as the key/value pair.
* Add a capability tag to each public cloud zone, using env:dev as the key/value pair.
* Add a capability tag to each vSphere cloud zone, using env:dev as the key/value pair.
* Add a capability tag to each vSphere cloud zone, using env:prod as the key/value pair.
* Add a capability tag to each public cloud zone, using env:prod as the key/value pair.

QUESTION 28

An administrator wants to use constraint tags to deploy cloud templates to a particular storage with a capability tag assigned; however, not all projects have access to this storage.

Which two tag formats can be defined at the cloud template level in order to ensure that cloud templates are deployed on this particular storage, whenever possible, and fail if not available? (Choose two.)

* value:key
* key:value:soft
* !key:value
* key:value:hard
* key:value

QUESTION 29

An administrator configures a lease policy with the following settings:

Maximum lease (days): 10

Maximum total lease (days): 30

Grace period (days): 5

If a user does not respond to any emails, after how many days will the deployment be destroyed? (Choose the best answer.)

* 15
* 10
* 35
* 40

QUESTION 30

Refer to the exhibit.

An administrator successfully deploys vRealize Automation (vRA) and configures a new directory in vRealize Suite Lifecycle Manager for the App-Dev team. The Add-Dev team needs to request catalog items and manage the subsequent deployments. The company security policy requires that users be granted the least privileges necessary to fulfill their role.

The administrator is assigned a ticket to address the issue that when the App-Dev members log into vRA, they receive the error shown in the exhibit. Based on initial investigation, all of the users experiencing the issue are members of the same Active Directory Group: App-Dev-Users. Upon review from within vRA Identity & Access Management, all of the users reporting the issue appear under the Active Users tab.

Which two actions should the administrator take within Identity & Access Management to resolve the reported issue while adhering to the security policy? (Choose two.)
* Under Enterprise Groups, assign the Service Broker User service role to the App-Dev-Users group.
* Under Active Users, assign the Service Broker Administrator service role to each of the impacted users.
* Under Enterprise Groups, assign the Service Broker Administrator service role to the App-Dev-Users group.
* Under Enterprise Groups, assign the Organization Member role to the App-Dev-Users group.

* Under Active Users, assign the Organization Owner role to each of the impacted users.

QUESTION 31

An administrator is trying to synchronize a new cloud template into the App-Dev project. The administrator copies the cloud template code directly from Cloud Assembly into a text file and uploads it into the Github repository so that it can be synchronized to the App-Dev project.

When the administrator clicks ‘Synch Repos’, a new cloud template does not appear.

Which step must the administrator take to allow it to synchronize from the Github repository?
* Upload the cloud template.
* Release the cloud template.
* Clone the cloud template.
* Add the name and version to the cloud template YAML code.
https://docs.vmware.com/en/vRealize-Automation/8.0/Using-and-Managing-Cloud-Assembly/GUID-1847AC57-157A-4319-B425-A1A4731C9DDA.html

QUESTION 32

Which two public cloud accounts are supported for vRealize Automation? (Choose two.)
* IBM Cloud
* Oracle Cloud
* Amazon Web Services
* Alibaba Cloud
* Microsoft Azure

QUESTION 33

Refer to the exhibit.

A new vRealize Automation user is logging in for the first time. Upon login, the user is presented with the attached screenshot.

Which step must the Organization Administrator take to resolve the issue? (Choose the best answer.)
* Assign the user a Content Developer role
* Assign the user the Directory Administrator role
* Assign the user the Organization Member role
* Assign the user a Service role

QUESTION 34

In vRealize Automation Cloud Assembly, what can administrators use Onboarding Plans to do? (Choose the best answer.)
* Find the best cloud template to match to discovered virtual machines.

* View a list of virtual machines that have not yet been data-collected from a public cloud account.
* Identify virtual machines that were deployed using vRealize Automation.
* Identify virtual machines that have been data-collected from a configured cloud account but are not yet managed by vRealize Automation.

QUESTION 35

An administrator creates a custom form for a RHEL cloud template. A user reports only being able to see the standard form when requesting the cloud template.

Which step should the administrator take to resolve this issue?
* Enable the custom form for the RHEL cloud template.
* Enable the custom form feature in Service Broker.
* Enable the custom form feature in Cloud Assembly.
* Enable the custom form in the project for the RHEL cloud template.
Service Broker – Content & Policies – Content – pick one blue print content and there are 3 little dots and a left side submenu for each content, click Customize Form – after Customization click Enable Custom forms is not a feature that have to be enabled on the Service Broker level. They are enabled on a per-catalog item basis so this answer makes the most sense.

QUESTION 36

An administrator creates a content source and would like to share all the imported cloud templates dynamically with the project members.

Which content sharing option should the administrator select to achieve this? (Choose the best answer.)
* All Content
* Static Content
* Content Sources
* Dynamic Content
Reference:

Content Sharing Methods in Service Broker

Method

Description

Content Source

A dynamic method to share all content items from the content source. When new items are added to a content source, each is made available in the catalog for the members of a target project.

QUESTION 37

Refer to the exhibit.

An administrator configures a lease policy, (“1 Day Lease”), for the App-Dev project so that machines have a starting lease of one day and a maximum lease of five days.

The following week, the administrator is assigned a ticket to address an issue with machines being deleted without any notifications being received. The administrator requests a new machine deployment through the App-Dev project’s service catalog. Given the one day lease period, the administrator expects to receive an automated “Lease Expiring” system immediately following a successful deployment; however, the email is not received. The administrator checks the deployment that has just been created (as displayed in the exhibit) and confirms that the “1 Day Lease” policy has been correctly applied.

Which action should the administrator take to resolve this issue? (Choose the best answer.)
* Add an email endpoint.
* Configure the notification email Server.
* Ensure the users have notifications enabled.
* Run the Configure mail workflow.

QUESTION 38

Which type of tag docs vRealize Automation Cloud Assembly automatically apply during provisioning to some deployments to support the analysis, monitoring, and grouping of deployed resources?
* Capability tag
* Standard tag
* Constraint tag
* Storage tag
Standard tags Cloud Assembly applies standard tags to some deployments to support analysis, monitoring, and grouping of deployed resources.

QUESTION 39

Which option should an administrator configure to implement storage profiles in cloud templates? (Choose the best answer.)
* Cloud zones
* Flavor mappings
* Projects
* Tags

QUESTION 40

What is the function of Action-Based Extensibility (ABX)? (Choose the best answer.)
* It provides the capability to migrate content between instances of vRealize Automation.
* It provides efficient capacity and cost management for managed virtual machines.
* It provides intelligent remediation and integrated compliance for security patches.

* It provides a way to execute stateless function, which contain reusable parameterized actions.
