[Jul-2022] Pass Oracle 1Z0-996-21 Tests Engine pdf - All Free Dumps

Oracle Utilities Customer Cloud Service 2021 Implementation Essentials Practice Tests 2022 | Pass 1Z0-996-21 with confidence!

### NEW QUESTION 42

What contains the details of how a bill was calculated and how it will be printed on a bill?

- \* Calculation Rules
- \* Rate Schedule
- \* Service Agreement
- \* Bill Segments
- \* Bill

### NEW QUESTION 43

Which entity defines the type of collection process to start based on age of debt, amount of debt, and type of customer?

- \* Debt Class
- \* Customer Class
- \* Collection Class Control

- \* Collection Class
- \* Collection Process Template

#### NEW QUESTION 44

What Service Order activity types does the application include?

- \* Start Service; Stop Service; Cut for Non-Payment; Reconnect Service for Payment; Exchange Meter; Move-In/Move-Out Service
- \* Start Service; Stop Service; Install Meter; Remove Meter; Exchange Meter; Move-In/Move-Out Service
- \* Enable Service; Disable Service; Install Meter; Remove Meter; Exchange Meter; Back-to-Back Service
- \* Enable Service; Disable Service; Cut for Non-Payment; Reconnect Service for Payment; Exchange Meter; Back-to-Back Service

#### NEW QUESTION 45

Which two statements about usage subscription types are correct? (Choose two.)

- \* Usage subscription types define the main billing contact.
- \* Usage subscription types define the time zone.
- \* Usage subscription types define the valid service point types.
- \* Usage subscription types define the recipient of the usage.

#### NEW QUESTION 46

A usage subscription must exist before usage transactions can be calculated for a specific service point.

Where do you configure the usage recipient?

- \* in the Usage Rule Type
- \* in the Service Point Type
- \* in the Device Type
- \* in the Measuring Component Type
- \* in the Usage Subscription Type

#### NEW QUESTION 47

Which three statements are true in relation to Financial Transaction creation algorithms? (Choose three.)

- \* They control how the payoff balance is affected.
- \* They control when a Financial Transaction is to be swept onto a bill.
- \* They control how the General Ledger details are created as these must always exist against a Financial Transaction.
- \* They control if and how the General Ledger entries are created.
- \* They control how the current balance is affected.

#### NEW QUESTION 48

Which statement supports usage transaction calculation?

- \* Bill determinants are derived from the final measurements for only interval measuring components or devices installed at the usage subscription's service points during the calculation period.
- \* Bill determinants are derived from the initial measurement data of the measuring components devices installed at the usage subscription's service points during calculation period.
- \* Bill determinants are derived from the final measurements of the measuring components or devices installed at the usage subscription's service points during the calculation period.
- \* Bill determinants are derived from the initial measurement data of the measuring components installed at the usage subscription's devices during the calculation period.

### NEW QUESTION 49

There has been a meter exchange at a service point in the past year.

How many installation events exist for the service point for the past year?

- \* Two
- \* One
- \* Four
- \* None
- \* Three

### NEW QUESTION 50

What correctly describes the possible causes of price proration?

- \* change in Bill Factor only
- \* changes in Rate Schedule and Bill Factor only
- \* change in Rate Schedule only
- \* change in Rate Version Calculation Group only
- \* changes in Rate Version Calculation Group and Bill Factor only

### NEW QUESTION 51

When creating a new business object for a service point (SP), what items are required to be able to view and update the new elements associated with the SP?

- \* Maintenance Object, Application Service, and Schema
- \* Schema, Validation Algorithm, and Maintenance UI Map
- \* Display UI Map, Display Map Service Script, and Maintenance UI Map
- \* Validation Algorithm, Post Processing Algorithm, and Lifecycle

### NEW QUESTION 52

As part of the service order processing, the algorithm D1-CNSPINSDV (Connect SP and/or Install Device) determines if a specific activity needs to be created based on the state of the service point.

Based on the status of the service point, what can this algorithm create?

- \* Device
- \* Device Configuration
- \* Smart Meter Command
- \* Service Point

### NEW QUESTION 53

When you cancel a payment, what will the system automatically do?

- \* generate a new Financial Transaction to reverse the original Financial Transaction
- \* cancel all tenders associated with the payment
- \* impact the credit rating
- \* charge a NSF Fee for the payment cancellation

### NEW QUESTION 54

Your client has the following requirements:

Many customers are installing their own solar electrical generation equipment. When these customers generate more electricity than required for their own use, the surplus can be exported back to the power grid.

In order to measure this generation, we have installed special scalar devices. These devices have separate registers to measure the energy generated (export) and the energy received (import) from the National Grid. Both reads will be stored in kWh, but the import is subtractive and export is consumptive.

What solution should you choose to configure the measuring component types for these specific requirements?

- \* Create two service points: one for subtractive import and the other for consumptive export.
- \* Create one new measuring component type for creating two measuring components (one for import and the other for export) that will be linked to one scalar device.
- \* Create one new measuring component type for creating a new measuring component that will be linked to two different scalar devices (one for import and the other for export).
- \* Create two new measuring component types (one for subtractive import and the other for consumptive export) to enable the creation of two measuring components that will be linked to one scalar device.

#### **NEW QUESTION 55**

Usage transactions can contain date breaks. Which is used to supply date breaks?

- \* the Deferred Monitor Calculation Algorithm
- \* the Usage Subscription Type
- \* the requesting system or user input
- \* the Usage Subscription BO

#### **NEW QUESTION 56**

A device has one or more measuring components that measure consumption, demand, or other values.

Which lists two attributes of a measuring component?

- \* Channel Multiplier and Channel ID
- \* Channel ID and Badge Number
- \* Serial Number and Badge Number
- \* Model and Serial Number
- \* Manufacturer and Model

#### **NEW QUESTION 57**

If a customer makes a payment for more than what is due for the account, which entity contains the logic for how this overpayment should be handled?

- \* Tender Type
- \* Installation Options
- \* Customer Class
- \* Pay Segment Type
- \* Service Agreement Type
