

Test4Engine 2V0-21.20PSE Dumps Real Exam Questions Test Engine Dumps Training [Q35-Q58]

Test4Engine 2V0-21.20PSE Dumps Real Exam Questions Test Engine Dumps Training
VMware 2V0-21.20PSE exam dumps and online Test Engine

QUESTION 35

When deploying a vCenter Server Appliance, which two single sign-on (SSO)-related options are presented to an administrator? (Choose two.)

- * Create a vCenter Enhanced Linked Mode group
- * Create a vCenter Single Sign-On domain
- * Join an existing vCenter Single Sign-On domain
- * Repoint to another domain
- * Reset Single Sign-On password

QUESTION 36

An administrator would like to make virtual machine templates and ISO images available to all vCenter Server instances in the data center. Which feature should the administrator use to achieve this goal?

- * Host profiles
- * Resource pools
- * Storage policies
- * Content libraries

Explanation

https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vm_admin.doc/GUID-254B2CE8-20A8

QUESTION 37

What is the foundation of a software-defined data center (SDDC)? (Choose the best answer.)

- * vRealize Operations Manager
- * vSphere
- * vSAN
- * NSX

QUESTION 38

An administrator wants to be able to send vCenter Server log files to a remote syslog server and analyze logs using vRealize Log Insight.

Which step must the administrator take to meet this requirement? (Choose the best answer.)

- * Configure the vCenter Server logging options using the vSphere Client.
- * Specify the remote syslog server name at deployment using the vCenter Server GUI Installer.
- * Specify the vRealize Log Insight system name using the vSphere Client.
- * Configure log file forwarding using the vCenter Server Management Interface.

Explanation

<https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vcenter.configuration.doc/GUID-9633A>

QUESTION 39

How does vSphere handle memory allocation during the instant clone process? (Choose the best answer.)

- * The first child virtual machine serves as a memory snapshot for any subsequent child virtual machines.
- * An identical clone of the parent virtual machine's memory is created for each child virtual machine
- * Memory is shared among all child virtual machines using a delta disk.
- * A unique memory pool is created per child virtual machine using copy-on-write.

Explanation

https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vm_admin.doc/GUID-853B1E2B-76CE

QUESTION 40

An administrator wants to leverage the processor-specific technology that uses a security extension for securing virtual machines (VMs). This will allow user-level code to define private regions of memory called enclaves that are protected from external access.

What does the administrator need to configure to enable VMs to use this technology? (Choose the best answer.)

- * Trusted Platform Module (TPM)
- * Virtual Intel Software Guard Extensions (vSGX)
- * Advanced Encryption Standard-New Instructions (AES-NI)

- * Transparent Page Sharing (TPS)

QUESTION 41

What is a pre-requisite for increasing datastore capacity?

- * The datastore is 100% full.
- * The datastore is managed by Storage DRS (SDRS).
- * The backing device for the datastore has enough free space.
- * There are NO powered-on virtual machines on the datastore.

Explanation

<https://docs.vmware.com/en/VMware-vSphere/6.7/com.vmware.vsphere.storage.doc/GUID-D57FEF5D-75F1-43>

QUESTION 42

An administrator identifies a snapshot file named “Win10-000001-sesparse.vmdk” on a datastore.

Which type of information can be determined about this datastore? (Choose the best answer.)

- * The datastore is formatted as VMFS3.
- * The datastore is formatted as VMFS6.
- * The datastore is a raw device mapping.
- * The datastore is a vSAN datastore.

QUESTION 43

What are two supported ESXi boot options? (Choose two.)

- * vSAN
- * NFS
- * iSCSI
- * SAN
- * vSphere Virtual Volumes

QUESTION 44

Refer to the exhibit.

What is the effective role the test1 account has on the Finance01 virtual machine?

- * Virtual machine user
- * Administrator
- * Read-only
- * No access

QUESTION 45

A new vSphere 7.0 environment is deployed with the following:

- * A single vCenter Server
- * Two vSAN clusters
- * A vSAN default storage policy

Which statement is true regarding virtual disk availability in this environment? (Choose the best answer.)

- * Replicas will be placed on different disk groups but can be placed on the same host.
- * All stripes will be placed on different disk groups and cannot be placed on the same host.
- * Each virtual disk will have four replicas of data.
- * Each virtual disk will have two replicas of data.

QUESTION 46

In a vSphere High Availability (vSphere HA) cluster, which condition can be detected by datastore heartbeating? (Choose the best answer.)

- * Fault tolerance virtual machine (VM) failover
- * Network isolation
- * Virtual machine (VM) disk failure
- * Datastore All Paths Down (APD) event

QUESTION 47

Each logical port on a vSphere standard switch can be a member of how many port groups? (Choose the best answer.)

- * 4
- * 3
- * 1
- * 2

QUESTION 48

A company has one corporate datacenter (C1) and one regional datacenter (R1). There is a vCenter Server in each location. An administrator wants a central library available to C1 and R1 for all templates and ISO images.

Which two steps must the administrator take to configure the content library feature to meet this requirement?

(Choose two.)

- * Create a published content library on C1.

- * Create a local content library on R1.
- * Create a local content library on C1.
- * Create a subscribed content library on C1.
- * Create a subscribed content library on R1.

QUESTION 49

Which feature is a pre-requisite for configuring admission control on a cluster? (Choose the best answer.)

- * vSphere Enhanced vMotion Compatibility (EVC)
- * vSphere High Availability (HA)
- * vSphere Fault Tolerance
- * vSphere Distributed Resource Scheduler (DRS)

Explanation

<https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.avail.doc/GUID-C4059DB9-D673-45C>

QUESTION 50

What can an administrator use to partition limited CPU and memory resources between two departments?

- * Resource pools
- * vCenter folders
- * vSphere distributed switch
- * vSphere High Availability

QUESTION 51

An administrator is investigating the reason for a powered on virtual machine failing to migrate with the following error log message:

```
The virtual machine requires hardware features that are unsupported or disabled on the target host.
```

```
CPUID details: incompatibility at level 0xx register 'xxx'  
Host bits: xxxx:xxxx:xxxx:xxxx:xxxx:xxxx:xxxx:xxxx  
Required: xxxx:xxxx:xxxx:xxxx:xxxx:xxxx:xxxx:xxxx
```

Which step should the administrator complete to resolve this error? (Choose the best answer.)

- * Configure High Availability on the cluster.
- * Configure vSAN on the cluster.
- * Configure Distributed Resource Scheduler (DRS) on the cluster.
- * Configure Enhanced vMotion Compatibility on the cluster.

QUESTION 52

An administrator is asked to take a snapshot of a virtual machine prior to an application upgrade. The virtual machine has one standard virtual machine disk (VMDK) and one physical mode raw device mapping (RDM) attached.

Which statement is true with regard to taking this snapshot? (Choose the best answer.)

- * The administrator will be able to snapshot the standard VMDK in independent persistent mode.
- * The administrator will be able to snapshot the RDM in independent persistent mode.
- * The administrator will be unable to snapshot the RDM.
- * The administrator will be able to snapshot both disks.

QUESTION 53

Which two VMware features are supported in a virtual machine using Intel Software Guard Extensions (Intel SGX) technology?
(Choose two.)

- * Fault tolerance
- * vSphere vMotion
- * VM encryption
- * Virtual machine suspend and resume
- * Storage I/O Control

Explanation

<https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.security.doc/GUID-EF552A5E-744B-4>

QUESTION 54

Which two storage technologies can an administrator use to deploy the Virtual Machine File System (VMFS)?

(Choose two.)

- * Fibre Channel storage
- * vSAN storage
- * Virtual Volumes storage
- * NFS storage
- * iSCSI storage

QUESTION 55

ESXi provides VLAN support by assigning a VLAN ID to which component?

- * Virtual standard switch
- * Virtual distributed switch
- * Port group
- * Physical network interface card (NIC)

QUESTION 56

Which type of network adapter is designed to provide connectivity to hosts and handle the standard system traffic of vSphere vMotion? (Choose the best answer.)

- * VMkernel port
- * VXLAN virtual tunnel end point (VXLAN VTEP)
- * Virtual machine network interface card (VMNIC)
- * VM network

QUESTION 57

An administrator is tasked with planning an upgrade of a VMware vSphere environment to version 7.0. The platform consists of 80 ESXi hosts, logically divided into 10 clusters. The tasks will be completed by another operations team within the company.

The hardware is consistent and a single embedded vCenter Server 6.7 appliance is managing the environment.

Which statement is true regarding a suitable upgrade approach? (Choose the best answer.)

- * The vCenter Server can be upgraded using a pre-configured customized JSON template.
- * The ESXi hosts can only be upgraded using the Graphical User Interface Installer.
- * Auto-deploy must be used to upgrade the large scale environment.
- * A new Platform Services Controller must be deployed first.

QUESTION 58

Refer to the exhibit.

Which two migration methods can an administrator use to move virtual machines from the SA-Dev cluster to the SA-Compute cluster? (Choose two.)

- * Cold migration of compute resource only
- * Cold migration of storage only
- * Hot migration of compute resource and storage resource
- * Hot migration of compute resource only
- * Cold migration of compute resource and storage resource
