- * Incident Response Plans
- * Security Incident Plans
- * Unexpected Event Plans
- * Emergency Incident Plans

NEW QUESTION 51

The Open Certification Framework is structured on three levels of trust. Those three levels of trust are:

- * CSA STAR Self-Assessment, STAR Certification & Attestation (Third-party Assessment), STAR Compliance
- * CSA STAR Audit, STAR Certification & Attestation (Third-party Assessment), STAR Continuous
- * CSA STAR Self-Assessment, STAR Certification & Attestation (Third-party Assessment), STAR Monitoring and Control
- * CSA STAR Self-Assessment, STAR Certification & Attestation (Third-party Assessment), STAR Continuous

NEW QUESTION 52

When using a SaaS solution, who is responsible for application security?

- * The cloud service provider only
- * The cloud service consumer only
- * Both cloud consumer and the enterprise
- * Both cloud provider and the consumer

Reference:

%20applications

NEW QUESTION 53

Which governance domain deals with evaluating how cloud computing affects compliance with internal security policies and various legal requirements, such as regulatory and legislative?

- * Legal Issues: Contracts and Electronic Discovery
- * Infrastructure Security
- * Compliance and Audit Management
- * Information Governance
- * Governance and Enterprise Risk Management

NEW QUESTION 54

Which of the following is an example of integrity technical impact?

- * The cloud provider reports a breach of customer personal data from an unsecured server.
- * A hacker using a stolen administrator identity alerts the discount percentage in the product database.
- * A DDoS attack renders the customer's cloud inaccessible for 24 hours.
- * An administrator inadvertently click on Phish bait exposing his company to a ransomware attack.

NEW QUESTION 55

When performing audits in relation to Business Continuity Management and Operational Resilience strategy, what would be the MOST critical aspect to audit in relation to the strategy of the cloud customer that should be formulated jointly with the cloud service provider?

- * Validate if the strategy covers unavailability of all components required to operate the business-as-usual or in disrupted mode, in parts or total- when impacted by a disruption.
- * Validate if the strategy covers all aspects of Business Continuity and Resilience planning, taking inputs from the assessed impact and risks, to consider activities for before, during, and after a disruption.
- * Validate if the strategy covers all activities required to continue and recover prioritized activities within identified time frames and agreed capacity, aligned to the risk appetite of the organization including the invocation of continuity plans and crisis management capabilities.
- * Validate if the strategy is developed by both cloud service providers and cloud service consumers within the acceptable limits of their risk appetite.

NEW QUESTION 56

How should controls be designed by an organization?

- * By the internal audit team
- * Using the ISO27001 framework
- * By the cloud provider
- * Using the organization's risk management framework

NEW QUESTION 57

Which of the following standards is designed to be used by organizations for cloud services that intend to select controls within the process of implementing an Information Security Management System based on ISO/IEC 27001?

- * ISO/IEC 27017:2015
- * CSA Cloud Control Matrix (CCM)
- * NIST SP 800-146
- * ISO/IEC 27002

NEW QUESTION 58

In the context of Infrastructure as a Service (IaaS), a vulnerability assessment will scan virtual machines to identify vulnerabilities in:

- * both operating system and application infrastructure contained within the CSP's instances.
- * both operating system and application infrastructure contained within the customer's instances
- * only application infrastructure contained within the CSP's instances.
- * only application infrastructure contained within the customer's instances.

NEW QUESTION 59

As a developer building codes into a container in a DevSecOps environment, which of the following is the appropriate place(s) to perform security tests?

- * Within developer's laptop
- * Within the CI/CD server
- * Within version repositories
- * Within the CI/CD pipeline

NEW QUESTION 60

Which statement best describes why it is important to know how data is being accessed?

- * The devices used to access data have different storage formats.
- * The devices used to access data use a variety of operating systems and may have different programs installed on them.
- * The device may affect data dispersion.
- * The devices used to access data use a variety of applications or clients and may have different security characteristics.
- * The devices used to access data may have different ownership characteristics.

NEW QUESTION 61

To support customer's verification of the CSP claims regarding their responsibilities according to the shared responsibility model, which of the following tools and techniques is appropriate?

- * Contractual agreement
- * Internal audit
- * External audit
- * Security assessment

NEW QUESTION 62

- * Nothing. There are simply limitations around the data that can be logged in the cloud.
- * Ask the cloud provider to open more ports.
- * You can instrument the technology stack with your own logging.
- * Ask the cloud provider to close more ports.
- * Nothing. The cloud provider must make the information available.

NEW QUESTION 64

Your SLA with your cloud provider ensures continuity for all services.

- * False
- * True

What does Riverbed offer their employees in terms of salary and benefits?

Riverbed offers a full range of compensation and benefits programs for their employees. Here is a summary of their offerings: Pay Scales and Ranges: Most Riverbed employees are paid using the Merit pay system, which is based on experience and job performance which are also included in ISACA **CCAK Dumps**. Average base salaries range from 40,000 USD to 100,000 USD per year. Wages can increase further with overtime pay, bonuses, and incentive plans.

Riverbed also offers some very generous benefits packages including:

A generous 10 days of vacation time, along with the flexibility of choosing between cash or vacation time for your remaining time off. Health Insurance Options: Riverbed offers some healthcare insurance options including a fully-insured health plan with premiums ranging from 86 USD to 166 USD per month depending on your coverage level and family size. A 401(k) plan that matches up to 4% of your salary with an additional 25% company contribution. This can amount to an additional 6% of your salary in retirement savings each year. They also offer a health plan with a Health Reimbursement Account (HRA) option that allows you to pay for eligible expenses out-of-pocket and then submit claims for reimbursement.
