H13-711_V3.0-ENU Study Guide Cover to Cover as Literally

NEW QUESTION 255

Which of the following statements about CarbonData in Fusioninsight are correct? (Multiple choice)

- * Carbon is also a high-performance analysis engine that integrates data sources with spark.
- * Carbon uses a combination of lightweight compression and heavyweight compression to compress data, which can reduce data storage space by 60%-80% and greatly save hardware storage costs.
- * carbon is a new type of Apache Hadoop local file format that uses advanced columnar storage, indexing, compression, and encoding technologies to improve computing efficiency, help speed up data queries over petabytes, and can be used for faster interaction Inquire.
- * The purpose of using carbon is to provide super-fast response to ad hoc queries on big data.

NEW QUESTION 256

In FusionInsight HD, which of the following components do Flink mainly interact with? (Multiple choice)

- * zookeeper
- * HDFS
- * Kafka
- * Yarn

NEW QUESTION 257

When the scale of the Hadoop cluster is large, the distribution of data will be very critical. Users need to decide whether the cluster is to be expanded and whether the data needs to be balanced according to the data distribution. Which of the following statements about Fusioninsight resource distribution monitoring are correct? (Multiple choice)

- * Help users quickly find the node with the highest resource consumption and adopt appropriate measures
- * Through the resource distribution viewing interface of each service homepage, you can view the distribution of key resources
- * Can help users quickly gather on the most critical resource consumption
- * Through the DashBoard interface, you can view the distribution of host resources. For example, a list of hosts with a memory occupancy rate of 50-75%, and link redirection is provided

NEW QUESTION 258

Which statement is correct about worker (worker process), Executor (thread) and task (task)?

- * Each Executor (thread) can run a number of tasks (tasks)
- * Each Executor (thread) can run different components (spout or bolt) of the task (task)
- * Each worker can run multiple Executors (threads)
- * Each worker can only run Executors (threads) for one topology

NEW QUESTION 259

What processes are included in the HBase service of Fusioninsight HD?

- * HMaster
- * Slave
- * HRegionServer
- * Data Node

NEW QUESTION 260

In the Fusioninsight HD V100R002C60 version cluster, which of the following components need to be planned for metadata partitioning? (Multiple choice)

- * HDFS
- * Zookeeper
- * Streaming
- * Redis
- * HBase
- * Kafka

NEW QUESTION 261

Which of the following are the main functions of Fusion Insight Manager? (Multiple choice)

- * Security Management
- * Data integration
- * System management
- * Service governance

NEW QUESTION 262

Which of the following scenarios is Sparki suitable for?

- * graph computation
- * Interactive query
- * batch processing
- * real-time stream processing

NEW QUESTION 263

Which of the following HBase components is correct? (Multiple choice)

- * Column-oriented
- * Type of NoSQL data
- * Distributed
- * The stored data is in the form of K-V

NEW QUESTION 264

What is the module used to manage the active and standby states of the Loader Server process in Loader?

- * ResourceManager
- * HAManager
- * Job Manager
- * Job Scheduler

NEW QUESTION 265

In Flink, the checkpoint mechanism can ensure that when an application fails during operation, it can be restored from a certain checkpoint. In this process, stream snapshots are created in sequence according to the order of data inflow.

- * True
- * False

NEW QUESTION 266

Which of the following are the characteristics of ElasticSearch?

- * High malleability
- * High fault tolerance
- * High reliability
- * high performance

NEW QUESTION 267

Flume supports monitoring and transmission of newly added files in the directory, enabling data transmission. Which type of source is described above?

- * spooling directory source
- * http source
- * exec source
- * syslog source

NEW QUESTION 268

LdapServerff? (group) is to unify usersgroup managementreason. likefruituserAdd to? ?middle.? ?middle? ?record.

- * TRUE
- * FALSE

NEW QUESTION 269

P? ?need? ?receive? ?Confirmation issued after? ?signal, when setting the MC?numbered?How many times means at least used?
?write?Le?, but does not require writing? ?write?

- * acka?1
- * an?1
- * an?2
- * an?0

NEW QUESTION 270

The compatibility of Flink is reflected in which of the following aspects?

- * Can be mixed with Hadoop's original mappers and reducers
- * YARN can be used as a resource scheduling manager for Flink clusters
- * Ability to use Hadoop formatted input and output
- * Ability to get more data from local

NEW QUESTION 271

During data stream processing,frequently used systemtimebetween(processing time)dofor an eventbetween. About Processing TimeWhich item is described incorrectly?

- * Processing TimeIt is suitable for scenarios with complex processing problems and high requirements for adjustable results.
- * Processing Timeexists betweenThe main reason for the difference is due to grid extensionLate, long processing time?Waitmakecompleted
- * Processing Time results are not reproducible, once stream computingVersionupgradeEven the system crashes, computing?will stop
- * In the actual application process, Processing Timeto be behindwith event time

NEW QUESTION 272

What storage formats does Hive support in the Fusioninsight HD system include? (Multiple choice)

- * HFile
- * TextFile
- * SequenceFile
- * RCFile

NEW QUESTION 273

Which of the following commands downloads directory files from HDFS to local?

- * dfs-cat
- * dfs -mkdir
- * dfs -get
- * dfs-put
