**NEW QUESTION 90**

Which two of the following items should be considered for inclusion in a comprehensive working outline of a SoW? (Select two options.)

* Schedule
* Contract administration
* Legal matters
* Technical considerations
* Financial matters

**NEW QUESTION 91**

Coupling with electrical circuits can create inductive interference to telecommunications facilities. Which of the following can decrease the coupling effect?

* Decrease the exposure length
* Make sure that the single-phase components add in phase
* Decrease the physical separation
* Increase the earth resistance

**NEW QUESTION 92**

In specifying labels and pruned tags that meet Underwriters Laboratories (UL) 969 Standard, marking and labeling systems are provided following the listed metrics. Which two of the following are REQUIRED for the UL standard? (Select two options.)

* Adhesion test
* Thickness test
* Texture test
* Durability test
* Visual inspection

**NEW QUESTION 93**

Which of the following statements Is CORRECT concerning best practice for horizontal cable management panels?

* One RU of management panel for each RU of cable patch panel plus one additional RU of cable management
* Two RU of cable management panel for each RU of patch panel
* Three RU of cable management panel for each RU of patch panel
* Two RUs of management panel for each RU of cable patch panel plus two additional RUs of cable management

**NEW QUESTION 94**

The program selection committee presents several programs for approval:

Program A is estimated to cost US$250,000, and has an annual cash inflow of US$75,000.
Program B is estimated to cost US$150,000, and has an annual cash inflow of US$55,000.
Program C is estimated to cost US$100,000, and has an annual cash inflow of US$45,000.
Program D is estimated to cost US$200,000, and has an annual cash inflow of US$35,000.

Which program was selected based solely on a three-year return on investment?
* Program A
* Program B
* Program C
* Program D

**NEW QUESTION 95**

A program manager recognizes that a successful resource being used in project A could also be used in project B.

What should the program manager do first to leverage the utilization of this resource?
* Assign project A&#8217;s resource to project B
* Reassign the resource to project B after protect A ends
* Prioritize the resource to optimize their use across both projects A and B
* Mitigate risk by leveraging other resources in project A

BICSI RCDDv14 Exam Syllabus Topics:
TopicDetailsTopic 1- Conduct final ICT inspections to ensure standard and code compliance, design intent, and- or client
requirements are metTopic 2- Review ICT bids- tenders for completeness to the Request for Proposal (RFP) response and
compliance to the designTopic 3- Design ICT telecommunication spaces to ensure standards compliance and- or client
requirements are metTopic 4- Perform field engineering- observations to clarify and provide direction to the installer as to
where issues existTopic 5- Calculate (size) ICT horizontal pathways to ensure standards and code compliance and- or client
requirements are metTopic 6- Produce ICT Bill of Materials- List of Materials (BOM- LOM) for the project stakeholders
Topic 7- Participate in the procurement of ICT materials to ensure the materials match the submittals-  Define scope of ICT Design
