SAP C-BOBIP-43 Exam Description:

The "SAP Certified Application Associate - SAP BusinessObjects Business Intelligence Platform 4.3" certification exam verifies

that the candidate possesses proven skills and fundamental knowledge in designing, deploying and running SAP BusinessObjects Business Intelligence platform 4.3. This exam measures the candidate's knowledge of SAP BusinessObjects Business Intelligence platform, starting with the tasks involved in supporting SAP Business Intelligence platform users and groups, so as to access corporate data through the SAP Business Intelligence platform's web portal. It tests the candidate's skills in configuring and managing servers in an SAP Business Intelligence platform deployment, as well as in designing and deploying an SAP Business Intelligence platform system.

NO.52 In BI 4.3, you want to promote a relational connection between development and quality systems. How can you automatically change the connection details?
* Use profiles in the Central Management Console (CMC).
* Use security profiles in the Information Design Tool (IDT).
* Use connection overrides in Promotion Management (PM).
* Configure connection pooling on the connection server.

NO.53 A scheduled Web Intelligence document failed.

Which of the following servers could be the cause of this problem?

Note: There are 3 correct answers to this question.
* Web Application Server
* Adaptive Processing Server
* Adaptive Job Server
* Web Intelligence Processing Server
* Output File Repository Server

NO.54 Which of the following tasks are performed by the Central Management Server?

Note: There are 2 correct answers to this question.
* Restart servers that have stopped unexpectedly.
* Manage auditing.
* Retrieve documents from the Input File Repository Server.
* Maintain a list of servers and IP addresses.

NO.55 From which server does the Crystal Reports Cache Server request pages?
* Report Application Server
* Crystal Reports Processing Server
* Input File Repository Server
* Adaptive Processing Server

NO.56 Why would you configure a second Server Intelligence Agent (SIA) on the same host?
* To allow servers to be secured separately
* To allow servers to run under different network accounts
* To take over the management of the first SIA’s server if it fails
* To increase the processing capacity of the host

NO.57 Which of the following can you do in the Monitoring application? Note: There are 2 correct Answers to this question.
* Edit or delete a system metric.
* Allow users to view a history of server metrics.
* Edit or delete a derived metric.

* Customize KPI status.

NO.58 How does the system behave if you have an Idle Connection Timeout setting on the Crystal Reports Cache Server that differs from the setting on the Crystal Reports Processing Server?
* If the setting on the Cache Server is higher than on the Processing Server, this will cause excessive consumption of disk space.
* If thesetting on the Cache Server is lower than on the Processing Server, a user request could be closed prematurely.
* If the setting on the Cache Server is higher than on the Processing Server, this could cause a memory overflow error.
* If the setting onthe Cache Server is lower than on the Processing Server, the data source connection could be closed prematurely.

NO.59 Which of the following servers acts as the system auditor?
* Adaptive Job Server
* Web Application Server
* Central Management Server
* Adaptive Processing Server

NO.60 What is the correct sequence of increasing rights in the predefined access levels?
* Schedule, View, View On Demand, Full Control
* View On Demand, View, Schedule, Full Control
* View, View On Demand, Schedule, Full Control
* View, Schedule, View On Demand, Full Control

NO.61 What is a dynamic recipient?
* An enterprise recipient to which multiple aliases have been assigned
* A publication recipient that is listed in an external document
* A publication recipient that has an alias in the business intelligence platform
* An enterprise recipient that is assigned to multiple profiles

NO.62 Where is the configuration information for processing servers stored?
* Input File Repository Server
* System database
* Bootstrap file
* Win32_x86 directory

NO.63 Which of the following tasks can you perform using the SAP BusinessObjects Lifecycle Management Console?

Note: There are 2 correct answers to this question.
* Run and schedule replication jobs on a remote system.
* Promote Business Intelligence objects from one system to another system in the same version.
* Back up your Business Intelligence content.
* Migrate Business Intelligence objects from a previous system version to a new system version.

NO.64 A user views a page in a Crystal report that exists on a cache server. Which server receives the page from the cache server?

Please choose the correct answer.

Response:
* Crystal Reports Processing Server
* Input File Repository Server
* Output File Repository Server
* Web Application Server

NO.65 What are the advantages of scaling a BI platform both vertically and horizontally?

Note: There are 3 correct answers to this question.

Response:
* Decreases I/O bottlenecks
* Increases schedule reporting capacity
* Increases overall system capacity
* Adds failover and load balancing
* Increases Java heap memory utilization

NO.66 What should you include in a disaster recovery plan for the business intelligence platform?

Note: There are 3 correct answers to this question.
* Customized code on the Web Application Server
* Registry settings of the Central Management Server
* .pid files for processing servers
* Contents of File Repository Servers
* Backup of the system database
