NO.49 Which of the following describes the difference between a general ledger and a general ledger account?

- * They are both related functionalities used for the same purpose.
- * A general ledger account is associated with task and expense codes rather than a business unit
- * General ledgers are required, while general ledger accounts are optional.
- * A general ledger account is associated with a business unit rather than task and expense codes.

NO.50 What is a company's SAP Fieldglass password policy?

- * A section that allows companies to define their own rules for how users must create passwords for accessing SAP Fieldglass
- * The important decision whether they require a password or single sign-on for their users to access SAP Fieldglass
- * A security awareness course that must be completed by a representative from every buyer company
- * A set of strict restrictions determined by SAP Fieldglass that applies to all buyer users globally

NO.51 What characteristics do Cost Centers have? Note: There are 2 correct answers to this question.

- * They correlate exactly with Business Units.
- * They are only associated to a single currency.
- * They are for allocating and tracking financial transactions
- * They represent functional units in which transactions will be billed.

NO.52 When reviewing details for an upload or download in the Integration Audit Trail, what is the unique identifier called?

- * Server Status
- * Transaction ID
- * Client Message
- * Initiator

NO.53 Which configuration allows Buyers to create a list of company-issued property that is distributed to contingent and SOW workers, such as badges and laptops?

- * Asset Type
- * Worker Pay Type
- * Qualification
- * Job Question

NO.54 Which of the following functions can be performed using a System Broadcast? Note: There are 3 correct answers to this question.

- * A System Broadcast can be retracted.
- * A System Broadcast can be scheduled for a specific date and time.
- * A System Broadcast can be targeted to specific user groups.
- * A System Broadcast can only be sent to users when the SAP Fieldglass agent runs overnight.
- * A System Broadcast can be sent to a user via email and their home page if configured to do so.

NO.55 Why would you associate proxy roles to a user role?

- * To select proxies for a single user that could serve as a proxy
- * To select proxies for multiple user roles that could serve as proxies for all
- * To select a single user who can perform the role of a proxy
- * To select the roles that could serve as proxies for that role

NO.56 How does an SOW bid approval process differ from the SOW approval process? Note: There are 3 correct answers to this question.

- * When an SOW Bid approval is required, those steps take place first before the SOW Module is engaged.
- * The remainder of the workflow after SOW Bids contains a classification, a supplier, and an SOW template.

- * The first steps for creating an SOW Bid are choosing the Classification and the Template, but the option to choose a supplier is not available.
- * The details of the SOW Bid will generate Details, Clauses, Characteristics, and SOW Workers.
- * After the SOW Bid has been populated and approved, it gets sent to multiple suppliers.

NO.57 Why would you use supervisor role functionality?

- * To use as a system role included in an approval group
- * To set up an individual user's supervisor shown in the org chart
- * To determine the escalation path for escalation thresholds
