[Q15-Q34] Latest VNX100 Exam with Accurate Versa Certified SD-WAN Associate PDF Questions [Mar 01, 2023]

[Mar 01, 2023] Latest VNX100 Exam with Accurate Versa Certified SD-WAN Associate PDF Questions

Practice To VNX100 - Test4Engine Remarkable Practice On your Versa Certified SD-WAN Associate Exam NEW QUESTION 15

You are an administrator of a Versa Secure SD-WAN network. Due to a recent security event, you need to apply a new URL filtering profile on all of the SD-WAN CPEs.

In this scenario, which template would you use to configure URL filtering?

- * QoS Template
- * Stateful Firewall Template
- * NexGen Firewall Template
- * Common Template

NEW QUESTION 16

Which two parts in the SD-WAN policy rules are used to steer traffic? (Choose two.)

- * Logging

- * Schedules
- * Applications
- * Anti-virus

NEW QUESTION 17

Which statement about a Versa spoke-to-hub-only topology is true?

- * Spoke devices can send traffic to other spokes through the hub.
- * Spoke devices can send traffic to other spokes directly.
- * Spoke devices can send traffic to other spokes through the controller.
- * Spoke devices can send traffic only to networks behind the hub.

NEW QUESTION 18

Which two methods are used to provision a Versa SD-WAN CPE? (Choose two.)

- * PXE boot provisioning
- * URL-based provisioning
- * Script-based provisioning
- * USB-based provisioning

NEW QUESTION 19

Which two configuration options are set in a Device Template workflow? (Choose two.)

- * number of WAN/LAN ports
- * Device Group
- * serial number
- * Direct Internet Access

NEW QUESTION 20

When onboarding a CPE using ZTP, the device shows up in the unknown device list in the Versa Director Inventory.

In this scenario, what caused this problem?

- * The template workflow configuration does not have the correct serial number of the CPE defined.
- * A non-Versa-branded appliance is used as the CPE.
- * The device workflow configuration does not have the correct serial number of the CPE defined.
- * The CPE is installed as a virtual machine.

NEW QUESTION 21

Which two statements about security zones in a Versa Secure SD-WAN solution are true? (Choose two.)

- * Security zones group interfaces into security domains.
- * Security zones provide segmentation of traffic.
- * Security zones separate routing information into separate routing tables.
- * Security zones hide interfaces from tenants in a multitenant environment.

NEW QUESTION 22

Which statement about URL-based ZTP is true?

- * URL-based ZTP is triggered using a console connection.

- * URL-based ZTP is supported only for Versa Gateway configurations.
- * URL-based ZTP supports only DHCP-based WAN links.
- * URL-based ZTP uses a link that can be sent over e-mail.

NEW QUESTION 23

You have configured a Versa Secure SD-WAN solution with a Full Mesh topology.

In this scenario, which statement is true?

- * The CPE devices send SLA probes on the active forwarding path only.
- * The CPE devices send SLA probes on all possible transport paths between devices.
- * The CPE devices send SLA probes to the Versa Controller, and the Versa Controller distributes active site statistics to other CPEs.
- * The CPE devices send SLA probes to the Versa Controller, and the Versa Controller relays the probes to CPE devices.

NEW QUESTION 24

By default, when configuring DIA through workflows, which protocol runs between the tvi interfaces connecting an Internet VR with the LAN VRF?

- * static routing
- * OSPF
- * BGP
- * VRRP

NEW QUESTION 25

A network operator wants to monitor a Versa CPE interface live data.

In this scenario, how would you accomplish this task?

- * using Versa Controller
- * using Versa Director
- * using Versa Analytics
- * using the Versa CPE GUI

NEW QUESTION 26

A group of users notified you that they are experiencing a network outage.

In this scenario, which two Versa components would you use to verify the live status of the WAN links? (Choose two.)

- * Versa Director device monitoring dashboard
- * Versa Analytics SD-WAN dashboard
- * Versa Director troubleshooting tools
- * Versa Analytics sites availability dashboard

NEW QUESTION 27

Which two statements about Versa Analytics are true? (Choose two.)

- * Versa Analytics provides the ability to configure logging parameters on SD-WAN CPEs.
- * Versa Analytics provides REST APIs for northbound integration with third-party tools.
- * Versa Analytics provides centralized logging information about the SD-WAN environment.
- * Versa Analytics provides real-time traffic monitoring dashboards.

NEW QUESTION 28

A device is being onboarded with two Internet interfaces. Direct Internet Access (DIA) needs to be configured.

In this scenario, which two statements are true? (Choose two.)

- * All underlay interfaces belong to the same VR instance.
- * Each underlay interface belongs to its own VR instance.
- * Both Internet interfaces can be selected for DIA in workflows.
- * Only one Internet interface can be selected for DIA in workflows.

NEW QUESTION 29

In a Post-staging Template, device-specific information such as WAN IP addresses, LAN subnets, and route ID are referred to as what?

- * Data Store
- * Bind Data
- * Staging Template
- * Device Group

NEW QUESTION 30

Which three components of Versa solution use the Versa Operating System? (Choose three.)

- * Versa Director
- * Versa Controller
- * Versa Analytics
- * Versa SD-WAN CPE
- * Versa SD-WAN Gateway

NEW QUESTION 31

A customer has a site activation planned using script-based provisioning; however, while unboxing the SD-WAN CPE, the engineer notices that the console cable is missing.

In this scenario, what would an engineer do to initiate the script-based provisioning?

- * Connect a laptop to any LAN port on the device.
- * Connect a laptop to any WAN port on the device.
- * Connect a laptop to the management port on the device.
- * Connect a laptop to the auxiliary port on the device.

NEW QUESTION 32

Which statement about site discovery in a Versa Secure SD-WAN solution is true?

- * When a new site is provisioned, the administrator must add the new site information to existing site configurations.
- * When a new site is provisioned, Versa Director notifies existing sites of the newly added site.
- * When a new site is provisioned, Versa Controller reconfigures existing sites with the new site details.
- * When a new site is provisioned, existing sites auto-discover the new site using MP-BGP.

NEW QUESTION 33

What are two node personalities in a Versa Analytics cluster? (Choose two.)

- * Controller
- * Search
- * Analytics
- * Gateway

NEW QUESTION 34

Your organization requires any new CPE deployment to have Versa Operating System version 20.2.2.

In this scenario, how would you accomplish this task?

- * Select preferred software version to 20.2.2 in the Common Template.
- * Select preferred software version to 20.2.2 in the Template Workflow.
- * Select preferred software version to 20.2.2 in the Device Bind Data.
- * Select preferred software version to 20.2.2 in the Device Group.
