(Apr-2023) HPE2-W07 Exam Dumps Contains FREE Real Questions from the Actual Exam [Q40-Q57]

(Apr-2023) HPE2-W07 Exam Dumps Contains FREE Real Questions from the Actual Exam
Free Test Engine Verified By HPE Sales Certified Certified Experts

What are the steps to follow for the registration of HP HPE2-W07 Certification - Step 1 Prerequisites- Step 2 Register with Pearson VUE- Step 4 Take the HPE2-W07 exam- It has its own syllabus

Briefly explain the Importance of HP HPE2-W07 Certification

The HP HPE2-W07 certification exam assesses the skills and knowledge of people interested in implementing and managing VMware virtualization. It covers essential skills, including system architecture, monitoring, installation, configuration management, virtual machine deployment, migration, cloning, and resource management. Switches support virtual machine workloads by providing the interface between physical and virtual networks. Actual exam questions and answers are available in the form of the **HPE HPE2-W07 exam dumps**. Correct answers can be worth 2 points, and there are 90 questions in the exam. The HPE2-W07 certification exam is a requisite for passing the HPE Sales Certification Board Exam. It uses a 100-point scale and a weighted formula to calculate an exam score. Network edge and the core of the network are important aspects of this exam. Wired network segment adapters are used for network connectivity, whether it is direct or remote access. Network switches are used to consolidate bandwidth, and create special-purpose networks. Level competitive advantage in this area can give you a competitive advantage when you are in the market. Control panel allows you to configure the HPE StoreVirtual data store and its settings.

NEW QUESTION 40

Which is one way that aruba instant on devices offer security tailored to the needs of your target customers.

- * They contact central aruba to receive centrally defined security policies to protect wired and wireless access
- * They support dynamic segmentation so they can offload security enforcement to aruba gateways
- * They automatically update their software to ensure they stay safe without extra customer attention.
- * They integrate with aruba Clearpass and enforce granular, user-based policies for micro-segmentation

NEW QUESTION 41

What is one benefit to you. as an Aruba Partner, of selling Aruba switches, as well as Aruba APs?

- * This approach will help you to stay focused on selling network Infrastructure hardware without being distracted by trying to attach software cross-sells or as-a-Service deals.
- * You can pursue more deals, as the wired total addressable market (JAM) is larger than the wireless one.
- * You can help the customer simplify the architecture and save money, as Aruba switches provide many of the same features as Aruba gateways.
- * This approach is the only way that you can pursue mobility opportunities for customers with Cisco switches, as Aruba APs are incompatible with Cisco switches.

NEW QUESTION 42

What is one key differentiating feature of Aruba ClearPass as compared to competitors such as Cisco?

- * ClearPass Policy Manager adjusts access permissions based on circumstances of the user and the device for both pre-admission and attack response.
- * ClearPass provides better visibility into application performance and user connectivity health than competitors.
- * ClearPass focuses on fully supporting Aruba devices rather than attempting to provide multi-vendor support.
- * ClearPass delivers both signature-based and anomaly-based detection of security threats instead of just signature-based.

NEW QUESTION 43

You are discussing Aruba ESP with a customer. The customer tells you that the company already has third-party tools for services such as network asset management and network analytics.

What should you explain?

- * Aruba Central offers APIs and an SDK that lets customers integrate many existing tools with Central
- * Aruba Not Edit provides both asset management and network analytics, and Aruba recommends deploying it instead of the current tools.
- * Aruba Central will save (ho customer money by replacing those tools with a free, cloud-based management tool.
- * Aruba Not Edit enables customers to integrate Aruba Central and the Aruba ESP solution with third-party tools.

NEW QUESTION 44

What business benefit does Aruba AirMatch provide?

- * better load balancing and availability for controllers
- * enhanced user experience in dense environments
- * simpler troubleshooting with AP and client tracking
- * better security through matching policies on wireless and wired

NEW QUESTION 45

Which challenge is introduced by an increasing number of IoT devices on the network?

- * As more potentially insecure devices connect from within, traditional perimeter solutions are no longer sufficient.
- * Because most IoT devices come with built in security, IT staff needs to be trained in those protocols and security software suites.
- * Devices are proliferating, while IoT deployments remain too immature to offer real business value to enterprises at this time.
- * Very few IoT devices support wireless and IP technologies, making it difficult to integrate them in the wireless network.

NEW QUESTION 46

Which 8400 switch software tool helps network administrators avoid configuration errors?

- * Aruba NetEdit
- * Time-series database
- * Zero-Touch Provisioning
- * HPE Smart Rate Ports

NEW QUESTION 47

A customer has an Aruba ESP (Edge Services Platform) solution. A site uses an AP-only deployment model.

Later the customer wants to use gateways.

- * Add the gateways, use thorn to control the existing APs. and use the gateways's UI to manage the network.
- * Add the gateways, there is no need to change the existing APs's mode, and the gateway can be managed by Aruba Central
- * Replace the existing APs will) now Campus APs, and then add the gateways.
- * Change the Apps's mode to Campus mode. upgrade to campus software and thon add the gateways

NEW QUESTION 48

What is one way Aruba solutions help healthcare companies support BYOD and BioMed initiatives?

- * Aruba Meridian regulates patient access and applies access controls that prevent patients from monopolizing bandwidth and interfering with more important traffic.
- * Aruba Client Match maximizes performance in a dense environment with many different types of devices, enabling staff to communicate and access records more quickly.
- * Aruba ClearPass automatically downloads software on every patient device to constantly track each asset's location, even if it leaves the premises.
- * Aruba IntroSpect strictly enforces HIPPA regulations by only making records available to healthcare providers if the patient provides his or her password.

NEW QUESTION 49

Which aspect of Aruba solutions does the Silver Peak acquisition enhance?

- * IDS/IPS
- * Ethernet and storage convergence
- * Wireless AIOps
- * SD-WAN

NEW QUESTION 50

about network performance. IT wants to automate processes Tor troubleshooting and ensure the network is optimized.

Based on this information, what solution should you discuss?

- * Aruba Dynamic Segmentation
- * Aruba AI Search
- * Aruba ClearPass Device Insight
- * Aruba AI Insight

NEW QUESTION 51

What is one reason you should recommend the Aruba 2930F rather than the Aruba 2540 at the access layer?

- * The customer needs static routing at the access layer, and the Aruba 2540 does not support any routing.
- * The customer needs Power over Ethernet (PoE+), and the Aruba 2540 does not support this feature.
- * The customer wants Smart Rate Ports, and the Aruba 2930F offers this feature.
- * The customer prioritizes scalability, and the Aruba 2930F supports Virtual Switching Framework (VSF).

NEW QUESTION 52

You are selling an Aruba wireless solution to a healthcare organization. The customer now mentions these additional pain points:

- * Nurses and other staff are wasting time searching for equipment.
- * Staff doesn't know when wheelchairs are left in other departments.

Based on these specific pain points, what additional solution should you recommend?

- * Aruba Central
- * Aruba Meridian and beacons
- * Aruba asset tracking tags
- * Aruba Analytics Location Engine (ALE)

NEW QUESTION 53

What is one differentiator that makes Aruba the best choice for Zero Trust Security?

- * Aruba Zero Trust Security focuses on scanning devices before they connect and avoids continuous monitoring to save resources.
- * Aruba began its business as a security vendor, which allows it to provide the perimeter defenses that Zero Trust Security requires.
- * Aruba reduces visibility into the network so that no one IT admin has a complete picture of the network and inventory.
- * Aruba Zero Trust Security segments users and devices traffic at the point of connection to implement granular, access-based controls.

NEW QUESTION 54

You are proposing an Aruba SD-Branch solution to a customer who is very concerned about security. Which unique Aruba feature should you explain?

- * Aruba branch gateways provide role-based access control and content filtering for both wireless and wired traffic at the branch.
- * Aruba SD-Branch enforces a secure traffic flow in which all traffic is routed through the firewalls at the data center.
- * Aruba SD-Branch uses Instant On network devices, which support industry security standards such as WPA3.
- * Unlike competitors such as Cisco, Aruba avoids integration with third-party security vendors and emphasizes all-in-one security with Aruba.

NEW QUESTION 55

Which of Aruba's guiding principles lets customers know that Aruba will prioritize their needs at every stage?

- * A “better than cloud” approach helps customers move away from expensive cloud to a network that was specifically designed for an on-prem deployment.
- * A “wired-first” approach lets customers know that Aruba is prepared for where the market is headed, due to the inherent insecurity of wireless devices.
- * An “IT knows best” approach means that Aruba emphasizes that it has the deep and mature technologies that customers need and that those technologies come with complexities.
- * A “customer first, customer last” approach means Aruba is committed to customer success at every stage, from product innovation and development to sales and support.

NEW QUESTION 56

What is a benefit that Aruba Mobility Master (MM) and an ArubaOS architecture bring to network management?

- * MM provides a centralized licensing repository and a single interface for configuring controllers.
- * MM offers a single management interface for configuring wireless devices and onboarding user wireless devices.
- * Customers can obtain a flexible, cloud-based option for managing their controllers centrally.
- * Admins can manage ArubaOS switches and ArubaOS controllers from the same management interface.

NEW QUESTION 57

A customer needs an AP that provides Wave 2 802.11ac for an outdoor environment.

Which AP Series meets the need?

- * AP 340
- * AP 303H
- * AP 360
- * AP 330
