QUESTION 37

Which two actions are valid based on identified risk behaviors in VMware Workspace ONE Intelligence Risk Analytics? (Choose two.)

- * Add authentication methods to the user or device with VMware Workspace ONE Access integration
- * Delete all previous risk scoring for the user
- * Move the user to the 'very high' risk category

- * Monitor the device or user
- * Add authentication methods to the user or device with VMware Workspace ONE UEM integration

QUESTION 38

Which prerequisite connector service is required for VMware Workspace ONE Access directory integration?

- * AirWatch Cloud Connector
- * User Auth Service
- * VMware Virtual App
- * VMware Directory Sync

QUESTION 39

Which two actions are required to set up Hub Virtual Assistant? (Choose two.)

- * Create Watson Assistant and Add Dialog Skill
- * Enable Workspace ONE mobile flows service with the ServiceNow chatbot
- * Create Search Skills in Watson Assistant
- * Design and configure the Hub Virtual Assistant page
- * Enable Employee Self-Service Support

QUESTION 40

A company has applications deployed in separate networks/locations which are managed by different identities. The company needs a technology that can empower the admin to securely provide Single Sign-on (SSO) experience to end-users across the board among these applications.

Which technology should be recommended?

- * Delegated Authentication
- * Basic Authentication
- * Legacy Authentication
- * Claims-Based Authentication

QUESTION 41

Which statement accurately describes modern claims-based identity management?

- * It supports multiple authentication methods except Single Sign-On
- * It doesn't support multiple providers
- * It requires the application to perform the authentication task
- * It makes account management easier by centralizing authentication

QUESTION 42

Hub Services is being integrated with VMware Workspace ONE Access to provide additional features.

Which three additional features become available? (Choose three.)

- * Templates
- * Customize Branding
- * Digital Badge
- * People Search
- * Hub Virtual Assistant

- * Employee Self-Service Support

QUESTION 43

An administrator is attempting to create a magic link in VMware Workspace ONE Access for day zero onboarding. After building the REST API request, the administrator receives the following status code:

409 – token.auth.token.already.exists

How should the administrator interpret this error?

- * The request served successfully
- * The user does not belong to the AD group that was configured for the token
- * A user could not be identified using the parameters passed in the body
- * A token was already generated for the user, so a fresh one cannot be generated

QUESTION 44

A VMware Workspace ONE administrator and the Information Security Officer reported that the Unified Access Gateway (UAG) front-end network is compromised. The compromised device was reconfigured to bypass the UAG.

Why did this action fail in a two-NIC deployment?

- * The UAG combines layer 5 firewall rules with layer 7 Unified Access Gateway security
- * The UAG combines layer 4 firewall rules with layer 7 Unified Access Gateway security
- * The UAG combines layer 3 firewall rules with layer 7 Unified Access Gateway security
- * The UAG combines layer 2 firewall rules with layer 7 Unified Access Gateway security

QUESTION 45

An administrator needs to configure OpenID Connect in VMware Workspace ONE Access for third-party identity providers so the users may use their credentials for single sign-on.

Which primary authentication protocol is used?

- * LDAP
- * FTP
- * IMAP
- * OAuth2

QUESTION 46

Which two virtual desktop infrastructures (VDI) are supported as an integration in VMware's Anywhere Workspace with the VMware Workspace ONE Access Connector v21.08+? (Choose two.)

- * Citrix
- * V2 Cloud
- * Workspot
- * ThinApp
- * Horizon

QUESTION 47

Workspace ONE Access has been implemented in the environment, and User and Kerberos authentication services are now being

configured.

Which component is required to enable these services?

- * Workspace ONE Content Gateway
- * Workspace ONE Access Connector
- * Workspace ONE UEM Cloud Connector
- * Workspace ONE Unified Access Gateway

QUESTION 48

A user is able to login to VMware Workspace ONE Access Catalog and launch a Citrix Desktop application without any prompt for credentials.

Which Authentication Method must have been previously executed to have gained access to the VMware Workspace ONE Access Catalog?

- * Kerberos Auth Adapter
- * OAuth SSO
- * True SSO
- * Password (Cloud Deployment)

QUESTION 49

Which step is required to configure Digital Employee Experience Management (DEEM)?

- * Ensure devices ownership type is set to employee-owned
- * Enable DEEM Workspace ONE Access
- * Integrate the productivity app with Workspace ONE SDK
- * Use Windows and/or macOS managed devices in Workspace ONE UEM

QUESTION 50

A customer has asked for recommendations around a disaster recovery architecture design for VMware Workspace ONE Access. The customer has an extremely aggressive recovery point objective and recovery time objective.

Which HA/DR design should be recommended, given the supported options?

- * Multi-datacenter design with two 3-node clusters, One 3-node cluster Datacenter 1 and the other 3-node cluster in Datacenter 2. The two 3-node clusters are setup in an active/passive configuration.
- * Multi-datacenter design with two 3-node clusters. One 3-node cluster Datacenter 1 and the other 3-node cluster in Datacenter 2. The two 3-node clusters are setup in an active/active configuration.
- * Multi datacenter design with two 3-node clusters, Both 3-node clusters are spanned across both datacenters, two nodes in one datacenter and one in the other, respectively. The two 3-node clusters are setup in an active/active configuration.
- * Multi-datacenter design with two 3-node clusters, Both 3-node clusters are spanned across both datacenters, two nodes in one datacenter and one in the other, respectively. The two 3-node clusters are setup in an active/passive configuration.

QUESTION 51

What is a prerequisite to have Aptelligent integrated with VMware Workspace ONE Intelligence?

- * VMware Workspace ONE UEM must manage VMware Workspace ONE Intelligence SDK apps as internal apps
- * VMware Workspace ONE Digital Employee Experience Management must be configured
- * VMware Workspace ONE Assist must be deployed on all iOS and Android devices
- * VMware Workspace ONE UEM must have MEMCached deployed

QUESTION 52

Which feature limits the number of changes that can be made to Users and Groups when updating directories in VMware Workspace ONE Access?

- * UEM Security PIN
- * Default Action For Inactive Users
- * Conditional Group Sync
- * Directory Sync Safeguard

QUESTION 53

Which service on the connector server must be able to access the RADIUS server when configuring RADIUS (cloud deployment) authentication?

- * Password Auth
- * Application Auth
- * User Auth
- * Cloud Connector

The VMware 5V0-61.22 exam, also known as the VMware Workspace ONE 21.X Advanced Integration Specialist exam, is designed for IT professionals who want to demonstrate their expertise in integrating and managing VMware Workspace ONE solutions in complex enterprise environments. This certification exam is the next step for those who have already earned the Workspace ONE Foundation certification and are looking to advance their skills and knowledge.
