

2023 Realistic C-S4CDK-2023 Dumps Questions To Gain Brilliant Result [Q20-Q43]

2023 Realistic C-S4CDK-2023 Dumps Questions To Gain Brilliant Result [Q20-Q43]

2023 Realistic C-S4CDK-2023 Dumps Questions To Gain Brilliant Result Start your C-S4CDK-2023 Exam Questions Preparation with Updated 82 Questions Q20. Which of the following activities run in XSUAA during the authentication setup?

Note: There are 2 correct answers to this question.

- * Issue and grant JSON Web Token
- * Validate JSON Web Token
- * Validate login details
- * Return response payload

Q21. You develop an application using the Cloud Foundry environment. How can you restrict access to this application? Note: There are 2 correct answers to this question.

- * Set the Scopes element to the required scope name in the xs-app.json file.
- * Define the role template name in the role-templates element of the xs-security.json file.
- * Set the role-name attribute of the Security-role element in the web.xml file to the required role template name.
- * Set the Scopes element to the required scope name in the xs-security.json file.

Q22. Which of the following services are available as side-by-side extensions to an SAP S/4HANA Cloud system in SAP Cloud Platform? Note: There are 3 correct answers to this question.

- * Data Marts & Analytics
- * IoT & Big Data
- * Addition of Database Fields
- * Process Innovation
- * Exposing Data

Q23. Which of the following are the fundamental guidelines of a twelve-factor application? Note: There are 3 correct answers to this question.

- * Cache management
- * Stateless and self-contained application processes
- * Security management of software layers
- * Separation of application code and runtime configuration
- * Traceability and reproducibility of all changes

Q24. In the figure shown, what is the role of the manifest-perf.yml file?

```
15
16 #Stage Specific Configurations
17 stages:
18   staticCodeChecks:
19     findbugsExcludesFile: # Path to findbugs exclude file
20     pmdExcludes: # List or ANT style patterns
21
22
23
24   cfTargets:
25     - space: 'Perf'
26       manifest: 'manifest-perf.yml'
27
28 # integrationTests:
29 #   credentials:
30 #     - alias: ''
31       credentialId: ''
```

- * It configures the stage-level values for specific stages.
- * It configures the credentials that will be used to connect to the Cloud Foundry environment account.
- * It configures the servers where the performance tests are carried out.
- * It configures the default values for test steps.

Q25. What is SAP's motivation for the new extensibility approach of SAP S/4HANA?

- * To achieve innovation without modifying the digital core.
- * To provide a high degree of flexibility to modify the standard APIs.
- * To enable usage of open-source technologies; usage in extensions.
- * To enable push-down to SAP HANA level in extensions.

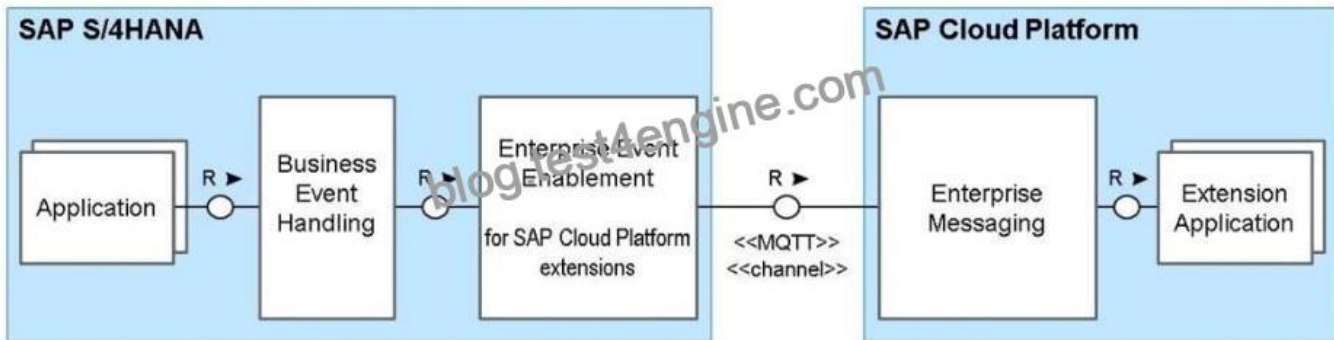

Q26. What must you do to mock SAP S/4HANA calls using SAP Cloud SDK? Note: There are 2 correct answers to this question.

- * Use annotation @InitClass on initClass() method.
- * Declare initialization method beforeClass().
- * Initialize testing params inside the setupClass() method.
- * Create an instance of the MockUtil class.

Q27. Where does the application router request the access token in the Cloud Foundry environment?

- * From the Credential Store service
- * From the business application using the OAuth 2.0 client credential flow
- * From the XSUAA service using the OAuth 2.0 authorization code flow
- * From the protected resources hosted by the resource server

Q28. What is the role of the SAP Cloud Platform Enterprise Messaging service in the diagram?

- * It enables the design and execution of business processes with SAP S/4HANA Cloud.
- * It provides out-of-the-box integration with SAP applications such as SAP S/4HANA Cloud.
- * It provides an API for the sending and the receiving application to communicate with each other.
- * It communicates directly with the Enterprise Event Management service using HTTPS.

Q29. Your JSON Web Token (JWT) is issued by the XSUAA service in the Cloud Foundry environment. What does this JWT contain?

- * The session ID of the user
- * The scope(s) to which the user is assigned
- * The list of applications the user can access
- * The SAML metadata of the user's identity provider

Q30. You are creating a Custom Business Object (CBO) in SAP S/4HANA Cloud. Which activities can you perform? Note: There are 3 correct answers to this question.

- * Choose the option to generate a UI.
- * Choose to generate an OData service.
- * Create multiple sub-nodes for one business object.
- * Create a custom service interface.
- * Access CBO in SAP S/4HANA Cloud BAdI implementations.

Q31. A user requires access to the Key User extension Apps in SAP S/4HANA Cloud. Which business catalog and business role must you assign?

- * Business catalog: SAP_BC_CORE_APP Business role: SAP_BR_ADMINISTRATOR
- * Business catalog: SAP_BC_CORE_COM Business role: SAP_BR_ADMINISTRATOR_DPR
- * Business catalog: SAP_CORE_BC_EXT Business role: SAP_BR_ADMINISTRATOR_DPR
- * Business catalog: SAP_CORE_BC_EXT Business role: SAP_BR_ADMINISTRATOR

Q32. Which of the Integration techniques used by side-by-side applications allows you to only read data?

- * Public APIs like oDATA, REST and SOAP APIs
- * Customer enabled oDATA service for released CDS views

- * BAPIs via SAP Cloud SDK or RFC using SAP Cloud Connector
- * Customer enabled oDATA service for Custom Business Objects

Q33. Which activities can you perform with the Custom CDS View app? Note: There are 2 correct answers to this question.

- * Import CDS view from an XML file
- * Join multiple associated data sources
- * Modify the data type of a field in existing CDS views
- * Define input parameters

Q34. How can you ensure that the value creation process continuously becomes safer and more resilient?

- * Develop tight software architectures.
- * Separate software teams by specialized skills.
- * Establish short and efficient feedback cycles.
- * Optimize batch working style.

Q35. How can you extend an app with custom logic using in-app extensions? Note: There are 2 correct answers to this question.

- * Implement custom logic at predesignated SAP enhancement points.
- * Ascertain that the app is extensible.
- * Apply modifications to the copy of the original app.
- * Assign new roles and catalogs to the extended app.

Q36. Which type of test is used in the first iteration of verifying that your software modules, such as classes, behave as expected?

- * Smoke test
- * Exploratory test
- * Unit test
- * End-to-end test

Q37. Which of the following are use cases for typical extension archetypes for the SAP Cloud SDK? Note: There are 3 correct answers to this question.

- * Preprocessing applications
- * Analytical applications
- * Security applications
- * Convenience applications
- * Internet applications

Q38. A section of code failed multiple times in a short timeframe. Which ErpCommand feature allows you to circumvent this section of code?

- * Fallbacks
- * Bulkheads
- * Circuit breakers
- * Thread-pools

Q39. Where do you place the Apache JMeter test plans when using Apache JMeter and Gatling?

- * In a folder under the /performance-tests directory
- * In the /performance-tests directory
- * In the /tests/performance directory
- * In a folder under the /tests/performance directory

Q40. What are some advantages when you use the Gatling tool? Note: There are 2 correct answers to this question.

- * Performance tests can be written as source code.

- * Test plans are written in Python.
- * The speed is optimized by adding a local download cache.
- * It reuses connections for virtual users.

Q41. Why are extensions on top of SAP S/4HANA Cloud NOT affected by the quarterly update cycle of SAP S/4HANA Cloud?

- * The Virtual Data Model of SAP S/4HANA Cloud remains unchanged.
- * The public interfaces of SAP S/4HANA represent a stable contract across the versions of SAP S/4HANA Cloud.
- * The extension application has access to stable private interfaces of SAP S/4HANA Cloud.
- * SAP runs unit and integration tests on extension apps before every quarterly update cycle.

Q42. What identifies event types in the messaging infrastructure?

- * A channel
- * A destination
- * A topic
- * A protocol

Q43. What do you confirm when the OAuth2 authorization server requests that you authorize an OAuth2 client?

- * That the OAuth2 client can act on behalf of the user only under a specific scope
- * That the OAuth2 client can act only on behalf of the cloud application
- * That the OAuth2 client can act only on its own behalf
- * That the OAuth2 client can always act on behalf of the user under the full set of scopes
