Q61. Which Cisco technology uses software-defined segmentation to simplify the provisioning of network access, accelerate security operations, and consistently enforce policy on the network?

- * Cisco Platform Exchange Grid
- * Cisco Talos
- * Cisco Stealthwatch Engine
- * Cisco TrustSec

Cisco TrustSec software-defined segmentation is simpler to enable than VLAN-based segmentation. Policy is defined through security groups. It is open through IETF, available within OpenDaylight, and supported on third-party and Cisco platforms.

Q62. Which phrase best describes Unified Communications?

- * Voice and video collaboration services accessed from a unified endpoint
- * Integrated voice, video, mobility, and presence services across endpoints, devices, and applications
- * Mobile endpoint applications that unify voice, video, and presence services to streamline communications and enhance productivity and collaboration
- * Video conferencing accessible across endpoints, devices, and applications within an organization

Q63. Which solution offers complete collaboration for midsize businesses up to 1000 employees?

- * Cisco BE7k
- * Cisco UC1k
- * Cisco Jabber
- * Cisco BE6k

<https://www.cisco.com/c/en/us/products/unified-communications/business-edition-6000/index.html> Your employees want to connect with co-workers, customers, and business partners from anywhere, using any device. Cisco Business Edition 6000 is more than just an IP phone system.

It is an all-in-one solution that solves complex communications challenges for business with up to

1,000 employees.

Q64. Which of the following describes the NFV ENCS Virtualized branch?

- * a cloud-delivered overlay WAN architecture that facilitates digital and cloud transformation for enterprises
- * a hybrid platform that combines the benefits of a traditional router and a traditional server to offer the same functionality with a smaller infrastructure footprint
- * a security application that mitigates vulnerabilities to offer branch and consumers protection where they need it most
- * a network device that mathematically verifies the entire network for correctness

Q65. Cisco TrustSec technology uses software-defined segmentation to simplify the provisioning of network access, accelerate security operations, and consistently enforce policy anywhere in the network. Which of the following is not a feature and benefit?

- * Apply policies across the network
- * Increased risks
- * Lower operational expenses
- * Streamline compliance

Q66. Cisco Intelligent Automation for Cloud software delivers the critical foundational layer for holistically deploying and managing cloud-based services. This software solution improves agility, flexibility, and speed with all but one of the following:

- * Physical resources
- * An orchestration engine
- * Self-service portal
- * Advanced cloud management capabilities

Q67. Which program requires partners to offer at least two cloud or managed services based on Cisco technology?

- * Cisco CMSP Advanced
- * Cisco Specializations
- * Cisco Solution Partner Program
- * Cisco CMSP Express

Q68. Which group represents the Cisco partnership levels?

- * Affiliate, Associate, Preferred, Select, Global
- * Bronze, Silver, Gold, Select, Multinational
- * Bronze, Silver, Gold, Platinum, Global
- * Select, Premier, Gold, Multinational, Global Gold

Explanation

Q69. What is one way that Cisco ONE provides business value to customers?

- * It increases the value of software by making the software portable across hardware.
- * It provides better solution suites by focusing exclusively on WAN.
- * It allows each department to manage IT separately by creating multiple portals for license management.
- * It allows IT to consume software only as CAPEX.

Q70. Which phrase describes the NFV ENCS Virtualized branch?

- * a security application that mitigates vulnerabilities to offer branch and consumers protection where they need it most
- * a hybrid platform that combines the benefits of a traditional router and a traditional server to offer the same functionality with a smaller infrastructure footprint
- * a cloud-delivered overlay WAN architecture that facilitates digital and cloud transformation for enterprises
- * a network device that mathematically verifies the entire network for correctness

Q71. Cisco DNA Analytics and Assurance allow users to automate network performance management in all of the following ways. Which is not true?

- * Simplify management
- * Gain network visibility
- * Save time, solve problems
- * Turn insights into

Q72. What is one benefit of the Cisco SD-WAN solution?

- * providing guest networks for customers, system integrators, and vendors
- * supporting agile software development and deployment processes through a single point of management
- * establishing transport -independent WAN for lower cost and higher diversity
- * continuous monitoring of the entire network environment in order to detect an abnormal wireless activity

Q73. Which Cisco network administration product enables the creation and enforcement of security and access policies for a company's connected endpoint devices?

- * Cisco Identity Services Engine
- * Cisco Platform Exchange Grid
- * Cisco Stealthwatch Enterprise
- * Cisco TrustSec

Q74. Which of these is one-step Cisco is aiming to take to reduce the company's environmental impact by the year 2022?

- * Cisco is improving product power consumption and aiming to increase system efficiency to 99 percent.
- * Cisco is aiming to use electricity generated from renewable sources for at least 85 percent of the company's global electricity needs.
- * Cisco is aiming to reduce greenhouse gas emissions by 15 percent from its global operations.
- * Cisco is aiming to run at least 35 percent of its global operations exclusively on solar power.
