[Q44-Q60] Excellent C_S4CDK_2023 PDF Dumps With 100% Test4Engine Exam Passing Guaranteed [Aug-2023]

Excellent C_S4CDK_2023 PDF Dumps With 100% Test4Engine Exam Passing Guaranteed [Aug-2023]

100% Pass Your C_S4CDK_2023 Certified Development Associate - SAP Cloud SDK Extensibility Developer at First Attempt with Test4Engine

SAP C-S4CDK-2023 is a certification exam for those who want to become certified development associates in the SAP Cloud SDK Extensibility Developer field. C_S4CDK_2023 exam is designed to test the candidate's knowledge and skills related to the development and extension of SAP cloud applications. C_S4CDK_2023 exam is based on the latest SAP Cloud SDK Extensibility Developer release, and it measures the candidate's ability to develop solutions using SAP Cloud Platform, SAP Cloud SDK, and SAP Fiori.

To take the C_S4CDK_2023 exam, candidates must have a basic understanding of SAP Cloud Platform, SAP Fiori, and SAPUI5 programming. They must also have experience working with SAP applications, such as SAP S/4HANA or SAP SuccessFactors. Candidates can prepare for the exam by taking SAP's recommended training courses and reviewing the exam content outline provided by SAP.

Q44. In which In-App extensions can you directly manage the usage of Custom Fields for the Apps enabled for key user extensions?

Note: There are 3 correct answers to this question.

- * Custom Tile
- * Enabled Business scenarios
- * Custom Analytics
- * Custom Forms
- * Custom Communication Scenarios

Q45. In which SAP Activate phase is the project initiated and planned?

- * Realize
- * Prepare
- * Discover
- * Explore

Q46. Which of the following are use cases for typical extension archetypes for the SAP Cloud SDK? Note: There are 3 correct answers to this question.

- * Preprocessing applications
- * Analytical applications
- * Security applications
- * Convenience applications
- * Internet applications

Q47. What is the restricted ABAP Language optimized for? Note: There are 3 correct answers to this question.

- * Reusability
- * Robustness
- * Scalability
- * Security
- * Data consistency

Q48. You have set up the scopes and attributes that are needed to protect your application in the Cloud Foundry environment, but a user CANNOT access your application. What might be the reason?

- * Roles collections are NOT assigned to the role template.
- * Roles are NOT assigned to the application.
- * Roles are NOT assigned to the user.
- * Role collections are NOT assigned to the user.

Q49. What is SAP's motivation for the new extensibility approach of SAP S/4HANA?

- * To achieve innovation without modifying the digital core.
- * To provide a high degree of flexibility to modify the standard APIs.
- * To enable usage of open-source technologies; usage in extensions.
- * To enable push-down to SAP HANA level in extensions.

Q50. Which tests are run in parallel to performance tests in the SAP Cloud SDK Pipeline?

- * Backend integration tests
- * Quality checks
- * Backend unit tests
- * End-to-end tests

Q51. Which of the following are benefits of using the OData Virtual Data Model of the SAP Cloud SDK? Note: There are 3 correct

answers to this question.

- * Type safety for functions
- * Database procedures provided out of the box
- * Auto completion of function names and properties
- * Commonly used SQL query technology
- * Easy access to create, update, and delete operations

Q52. What happens in the build stage of the SAP Cloud SDK Pipeline?

- * The maven goal test runs in the unit-test module of your project.
- * The maven goal install runs in the root folder of your project.
- * The npm script start runs in the same folder as the package.json.
- * The npm script ci-e2e runs in the test folder of your project.

Q53. In the figure shown, what is the role of the manifest-perf.yml file?

- * It configures the stage-level values for specific stages.
- * It configures the credentials that will be used to connect to the Cloud Foundry environment account.
- * It configures the servers where the performance tests are carried out.
- * It configures the default values for test steps.

Q54. Which of the following are core principles of DevOps? Note: There are 3 correct answers to this question.

- * Continuous learning and experimentation
- * Feedback
- * S
- * Design-led thinking
- * Scaling

Q55. A user requires access to the Key User extension Apps in SAP S/4HANA Cloud. Which business catalog and business role must you assign?

- * Business catalog: SAP_BC_CORE_APP Business role: SAP_BR_ADMINISTRATOR
- * Business catalog: SAP_BC_CORE_COM Business role: SAP_BR_ADMINISTRATOR_DPR
- * Business catalog: SAP_CORE_BC_EXT Business role: SAP_BR_ADMINISTRATOR_DPR
- * Business catalog: SAP_CORE_BC_EXT Business role: SAP_BR_ADMINISTRATOR

Q56. Which authentication and connection activity does the SAP Cloud SDK handle automatically?

- * It creates a communication arrangement with the user ID and password in the SAP S/4HANA Cloud system.
- * It determines the configuration by consuming the destination service on SAP Cloud Platform.
- * It exchanges the SAML assertion with the identity provider.
- * It manages user accounts and provides Single Sign-On.

Q57. Which methods must you implement in TenantProvisioningServlet when you implement a multi-tenant application? Note: There are 2 correct answers to this question.

- * PUT
- * GET
- * POST
- * DELETE

Q58. What are some of the capabilities of the SAP S/4HANA Virtual Data Model? Note: There are 2 correct answers to this question.

- * It provides a native UI to query the database tables.
- * It documents the relationships between entities.
- * It enriches the entities with business semantics.
- * It simplifies database access.

Q59. Your JSON Web Token (JWT) is issued by the XSUAA service in the Cloud Foundry environment. What does this JWT contain?

- * The session ID of the user
- * The scope(s) to which the user is assigned
- * The list of applications the user can access
- * The SAML metadata of the user's identity provider

Q60. What is the role of the Jenkins server in the SAP Cloud SDK Continuous Delivery Toolkit?

- * It is the main component that runs the build pipeline.
- * It is responsible for building the backend components.
- * It allows projects to be deployed to various SAP Cloud Platform accounts.
- * It starts the Cx server on the host or virtual machine.
