Pass SAP C-IBP-2302 PDF Dumps | Recently Updated 82 Questions
Updated Test Engine to Practice C-IBP-2302 Dumps & Practice Exam

Individuals who successfully pass the SAP C-IBP-2302 certification exam receive a certificate that validates their mastery of SAP IBP for Supply Chain Operations. Certified Application Associate - SAP IBP for Supply Chain (2302) certification helps individuals to showcase their expertise and can lead to career advancement opportunities, such as promotions, better job roles, and an increased salary. Additionally, certified professionals can join the SAP community and participate in ongoing education and training programs to continue their professional development.

QUESTION 48

Which applications are present in the sample model SAPIBP1?Note: There are 3 correct answers to this question.

- * Demand Driven Replenishment
- * Response Planning
- * Sales and Operations Planning
- * Inventory Optimization

- * Demand Sensing

QUESTION 49

What function would you use to configure a year-to-date calculation?

- * Rolling Aggregation
- * Last Period Aggregation
- * Cumulative Aggregation
- * Dynamic Rolling Aggregation

QUESTION 50

What are the S&OP operator (optimizer) parameters associated with demand fair share?

- * Number of fair share segments Additional tiering costs (default) Number of fair share segments late delivery
- * Number of fair share segments Additional tiering costs (default) Inventory days of supply
- * Number of fair share segments Maximum days of coverage Number of fair share segments late delivery
- * Number of fair share segments Additional tiering costs (default) Maximum inventory

QUESTION 51

Which of the following are inputs to Demand Sensing with Gradient Boosting (Full) algorithm?Note: There are 2 correct answers to this question.

- * Sales Order Quantities (both historical and future open orders)
- * Forecast Error CV Calculated by Manage Forecast Error Calculations app
- * Future Consensus Forecasts and Lagged Forecast Snapshots
- * Recommended Safety Stocks from Multistage Inventory Optimization

QUESTION 52

You have set up a planning area, and data is now available. You adjust the necessary time profile settings and run a consistency check.Which settings can you change and still run a successful consistency check?Note: There are 2 correct answers to this question.

- * Add a new time profile level to the time profile.
- * Change the numbering hierarchy of the period IDs in the time profile.
- * Change the description of the attributes in the time profile.
- * Change the past and future horizon of the levels in the time profile.

QUESTION 53

Which pre-processing steps can be used to cleanse historical sales data before generating a statistical forecast in SAP IBP?Note: There are 2 correct answers to this question.

- * Substitute Missing with Mean or Median in Sales History
- * Intermittency Detection and Correction in Sales History
- * Promotion Sales Lift Elimination
- * Bias Detection and Correction in Sales History

QUESTION 54

You are developing the functionality and appearance of the Excel UI for SAP IBP business users.Which extensibility capabilities for SAP IBP, add-in for Microsoft Excel are provided by Custom VBA coding?Note: There are 2 correct answers to this question.

- * Changing the member names

- * Changing the layout of the master data workbooks
- * Changing the entries from the Name Manager
- * SAP IBP ribbon extension

QUESTION 55

Which of the following are valid use cases for using the Realignment App? Note: There are 2 correct answers to this question.

- * Changing customer sources and reassigning customers to new DCs
- * Removing outliers from the sales history of a reference product before transferring its sales to a new product
- * Using the realignment run to identify obsolete data
- * Merging two locations into a new location

QUESTION 56

You define fixing for a key figure. Which of the following functions are available for this key figure? Note: There are 2 correct answers to this question.

- * Fixing is possible for manually editable key figures.
- * Fixing is possible for a certain period, including all child values in the hierarchy.
- * Fixing is possible for a certain quantity of a key figure value.
- * Fixing is possible for system editable key figures.

QUESTION 57

What are the relevant use cases for helper key figures? Note: There are 2 correct answers to this questions.

- * Used at any level of calculation level except the Request Level
- * Used when you have more than three inputs at different planning levels in one calculation
- * Used by end-users in planning views to help visualize cross-period calculations
- * Used to break down a large calculation into manageable subcalculations

QUESTION 58

Which of the following are capabilities of the Manage Forecast Error Calculations – Inventory Optimization app? Note: There are 2 correct answers to this question.

- * Adjust for forecast bias in Forecast Error CV calculations
- * Propagate forecast error to upstream locations in a supply chain network
- * Adjust Safety Stock Recommendations based on forecast error CV input
- * Identify intermittent demand for Forecast Error CV calculations

QUESTION 59

You are evaluating criteria for choosing the solver to support planning for a complex supply chain. What are some of the points that should be reviewed? Note: There are 2 correct answers to this question.

- * Push and Pull production models are used by the optimizer.
- * Finite heuristics can achieve demand prioritization and pegging.
- * Planning results can be generated faster by the optimizer.
- * Prioritization of demand elements one by one is achieved by unconstrained heuristics.

QUESTION 60

Which of the following are examples of time-independent key figures? Note: There are 2 correct answers to this question.

- * A special key figure marked as an aggregate key figure (aggregate constraint)
- * A currency conversion key figure, such as exchange rate
- * A unit of measure key figure, such as UOMCONVERSIONFACTOR
- * A forecast metric key figure, such FCSTMAPE

QUESTION 61

Which of the following solutions are feasible when using the time series supply optimizer?Note: There are 3 correct answers to this question.

- * Violation of minimum resource utilization
- * Not adhering to maximum transport values
- * Not respecting production capacity
- * Violation of minimum aggregated inventory values
- * Not-fully satisfied demands

QUESTION 62

What actions can be performed in the Advanced Dashboards application?Note: There are 3 correct answers to this question.

- * Link two analytics charts.
- * Rename the charts.
- * Add process templates.
- * Display all assigned analytics on a single UI.
- * Use drill-down functionality.

QUESTION 63

You are modeling a new product introduction.Which of the following steps can be part of your modeling process in the Manage Product Lifecycle app?Note: There are 2 correct answers to this question.

- * Enter the product family to which the new product belongs
- * Enter the Phase-out Start Date and Phase-out End Date
- * Create planning objects for new combinations in the app
- * Copy the launch dimension from the reference product to the new product

QUESTION 64

What are some of the prerequisites for configuring a planning area that results in a successful consistency check?Note: There are 2 correct answers to this question.

- * Configure at least one calculated key figure for the planning area.
- * Specify a planning horizon in the planning area for each level of the assigned time profile.
- * Configure at most two input key figures on the same planning level in a key figure calculation.
- * Assign the compound master data type and its component master data types.
