Give You Free Regular Updates on C_TADM_22 Exam Questions Oct 28, 2023
Achieve the C_TADM_22 Exam Best Results with Help from SAP Certified Experts

SAP Certified Technology Consultant - SAP S/4HANA System Administration (C-TADM-22) exam is intended for individuals who wish to demonstrate their proficiency in the administration of SAP S/4HANA systems. C_TADM_22 exam is designed to test the candidate's knowledge of system administration, as well as their ability to troubleshoot and optimize system performance. C_TADM_22 exam covers topics such as system architecture, installation and configuration, system monitoring and maintenance, and database management.

Q48. When installing an SAP S/4HANA Server 1909 system, which actions can the Software Provisioning Manager (SWPM) perform only when the installation is started with the option

SAPINST_STACK_XML? Note: There are 3 correct answers to this question.
* Apply a SPAM/SAINT update

- * Set the password of user DDIC in client 000
- * Set up Transport Management System (TMS)
- * Import additional languages
- * Install an SAP Host Agent

Q49. What actions can you perform using the SAP_FIORI_FOUNDATION_S4 task list? Note: There are 3 correct

answers to this question.

- * Schedule a job for calculation of SAPUI5 application index.
- * Generate SAP Fiori foundation roles.
- * Replicate backend catalogs.
- * Enable SAP GUI for HTML.
- * Create users with generated business roles.

Q50. Using standard tp settings, how does the transport strategy **Queue-Driven Transports, Mass transports**; differ

from **Queue-Driven Transports, Single transports**? Note: There are 3 correct answers to this question.

- * Using the **Import Request**; button causes the imported transport requests to remain in the import queue.
- * The **Import All Requests**; button is available.
- * Return Code 16 is caused by an erroneous object in a transport request.
- * Return Code 8 is considered a successful import.
- * The import process can be scheduled in the background.

Q51. How does SAP HANA encrypt the data persistence layer?

- * By row level
- * By page level
- * By column level
- * By table level

Q52. Which file systems are supported for the data and log volumes of the SAP HANA 2.0 database system? Note:

There are 2 correct answers to this question.

- * OCFS2
- * Btrfs
- * XFS
- * GPFS

Q53. You have configured an SAP Web Dispatcher and set: `wdisp/ssl_encrypt=2`

`icm/server_port_<xx>=…PROT=HTTP`. Which communication channels does this establish?

- * HTTP between the client and SAP Web Dispatcher. HTTPS between SAP Web Dispatcher and the SAP

system

- * HTTPS between the client and SAP Web Dispatcher. HTTP between SAP Web Dispatcher and the SAP

system

- * HTTP between the client and SAP Web Dispatcher. HTTP between SAP Web Dispatcher and the SAP

system

- * HTTPS between the client and SAP Web Dispatcher. HTTPS between SAP Web Dispatcher and the

SAP system

Q54. How can the system database administrator disable tenant database functionalities? Note: There are 2 correct answers to this question.

- * Using the hdbuserstore tool
- * Using the Manage Restricted Features app
- * Using the Manage Database Configuration app
- * Using the resident hdblcm tool

Q55. You can use operation modes to change the quantity of which work process types? Note: There are 3 correct answers to this question.

- * Standby/restricted/reserved dialog work process
- * Dialog work process
- * Update work process
- * Spool work process
- * Background work process

Q56. You are using a standard three system landscape, DEV, QAS, and PRD. When will a change of a repository object in the QAS system be treated as correction?

- * If the object was created in DEV and transported to QAS via a transport of copies.
- * If the object's name is in the SAP name range.
- * If the object was created in DEV and transported to QAS via a workbench request.
- * If the original system of the object is QAS.

Q57. You are using a Change and Transport System (CTS) for the transport of native SAP HANA applications.

Which tool can you use to create a transport request for these applications in the CTS system?

- * Transport Organizer Web UI (in transaction STMS)
- * Transport Organizer (Extended View) (in transaction SE01)
- * Transport Organizer (in transaction SE09)
- * Database Assistant (in transaction DB50N)

Q58. In an SAP S/4HANA Server system, a target system alias, FIORI, is maintained for source system alias

S4FIN. Which connection is relevant for the extraction of back-end catalogs with alias S4FIN?

- * S4FIN_RFC
- * FIORI_RFC
- * S4FIN_HTTPS
- * FIORI_HTTPS

Q59. How does a Transport of Copies differ from a Workbench Request? Note: There are 2 correct answers to this question

- * After the import, repository objects in the target system are classified as copies.
- * When creating the transport request, a target system without a consolidation route can be selected.
- * No cofile is created, when releasing the transport request with the Transport Organizer (SE09).

- * When importing, the transport request is not forwarded to subsequent delivery systems.

Q60. Which instances have processes that establish a connection to the database of an SAP system?

Note: There are 2 correct answers to this question.

- * Enqueue Replication Server
- * Primary Application Server
- * Additional Application Server
- * Central Services

Q61. When importing a transport request, which steps are executed by a batch job? Note: There are 3 correct

answers to this question.

- * Import of dictionary objects
- * Distribution
- * Activation of dictionary objects
- * Move nametab
- * Activation of ABAP programs

Q62. When you install SAP Solution Manager 7.2 AS Java, what information do you need to provide? Note: There

are 2 correct answers to this question.

- * The decision whether to install an SAP Gateway integrated in the SCS instance
- * The package path to an archive for SAP JVM
- * The package path to additional language installation media
- * The decision to use an External ABAP System as UME Data Source

Q63. You want to configure the TMS QA Approval procedure for an AS ABAP-based system landscape.

Which approval steps can you choose? Note: There are 3 correct answers to this question.

- * To be approved by request owner
- * To be approved by developer
- * To be approved by system administration
- * To be approved by project manager
- * To be approved by department

Q64. In which subdirectories of sapmnt can you find information about startup problems of an AS Javabased SAP

system? Note: There are 2 correct answers to this question.

- * D<instance no.>/work
- * J<instance no.>/work
- * J<instance no.>/log
- * SCS<instance no.>/work

Q65. Under which Java System Properties category do you find an AS Java-based Manager in the SAP NetWeaver

Administrator (NWA)?

- * Kernel
- * VM Environment
- * Applications
- * Services

Q66. You want to configure the transport domain for the transport of AS Java-based SAP systems (for example SAP Enterprise Portal). Which entry type do you create for these systems in the System Overview area of the

Transport Management System (transaction STMS)?

- * Virtual System
- * External System
- * Java Stack Configuration
- * Non-ABAP System

Q67. When performing a local client copy with transaction SCCLN, in which client is it recommended to start the client copy?

- * A client different from both the source and the target client
- * The source client
- * The target client

Q68. During startup, an AS Java-based SAP system generates an error. Which file contains information about manager and services?

- * dev_jstart
- * dev_icm
- * std_server<X>.out
- * jvm_bootstrap.out

Q69. Using the Java Startup and Control Framework, what is the correct sequence of steps to start an application server of an AS Java-based SAP system?

- * Start Offline Deployment Start bootstrap process Start ICM/Server process(es) Connect to Message

Server

- * Connect to Message Server Start Offline Deployment Start bootstrap process Start ICM/Server

process(es)

- * Start ICM/Server process(es) Start Offline Deployment Start bootstrap process Connect to Message

Server

- * Connect to Message Server Start bootstrap process Start Offline Deployment Start ICM/Server

process(es)

Q70. You are running an AS ABAP-based SAP system. Which parts does the Internet Server Cache (ISC) of the ICM process consist of? Note: There are 3 correct answers to this question.

- * Browser cache
- * CPU cache
- * Disk cache
- * UFO cache
- * Memory cache

Q71. You plan to update an AS ABAP-based SAP system with the role “Quality Assurance System”.

Which of the following actions might be required before you start Software Update Manager

(SUM) for this system? Note: There are 2 correct answers to this question.

- * Import the modification adjustment transports from the update of the “Development System”.
- * Follow the instructions in the SAP Notes for the used version of SUM.
- * Update the database software.
- * Execute the SAP Load Generator (SGEN) transaction for invalid loads.

Q72. You want to set up a printer locally on a Microsoft Windows-based AS ABAP. Which host spool access

method must you use?

- * L
- * U
- * G
- * C
