

PEGAPCSA87V1 Pre-Exam Practice Tests (Updated 251 Questions) [Q73-Q90]

PEGAPCSA87V1 Pre-Exam Practice Tests | (Updated 251 Questions) Valid PEGAPCSA87V1 Exam Q&A PDF - One Year Free Update

The PEGAPCSA87V1 certification exam is a 90-minute exam that consists of 53 multiple-choice questions. The candidates need to score at least 65% to pass the exam. PEGAPCSA87V1 exam covers various topics, including Pega 7 Platform, Pega Application Design, Pega Case Management, Pega Integration, and Pega Security. PEGAPCSA87V1 exam questions are designed to test the candidate's knowledge and practical skills in designing and implementing Pega applications. Passing this certification exam demonstrates the candidate's expertise in Pega application development, which is highly valued in the industry.

QUESTION 73

A restaurant has a case type that allows customers to book the dining room for events. Customers provide basic information including party size and indicate whether they want the restaurant to cater the event.

If catering is not required, customers are given a rental rate quote.

If customers indicate that they want the restaurant to cater the event, they must provide menu preference and schedule and appointment to do menu testing before they are given a quote.

Which two options do you use to configure the case type to achieve the requested behavior? (Choose Two.)

- * Create a check box for customers to indicate whether they want the restaurant to cater the event. Add a decision shape that evaluates whether the customer checks the box.
- * Create a check box for customers to indicate whether they want the restaurant to cater the event. Configure the menu preferences and appointment date fields with a visibility condition.
- * Create a process for providing menu preference and scheduling the menu tasting appointment. Create a parallel process for providing the customer with the rental rate quote.
- * Create a process for customers to indicate menu preference and schedule the menu tasting appointment. Add the process as a case-wide optional action.

QUESTION 74

A case type for voiceover requests includes two tasks: Edit Script and Record Script. Your team has been asked to route Edit Script tasks to editors and Record Script tasks to actors.

Which approach fulfills this requirement?

- * Create two new work queues, one for editors and one for actors.
- * Create one new work queue and split the tasks by type.
- * Create one work group for both personas and route to the work group.
- * Create two new work groups in Dev Studio that reference one work queue.

QUESTION 75

Which two statements are true about insights? (Choose two.)

- * You can search for and select the fields that you want to include in an insight.
- * You can transform data queries into sharable visualizations.
- * You can transform sharable visualizations into data queries.
- * You can edit application data directly in an insight.

QUESTION 76

Which two conditions do you test with a unit test? (Choose Two)

- * A data page populates without any errors.
- * A property value is set correctly by a data transform.
- * An application displays user views for 20 users within three seconds.
- * An application is successfully migrated to a test system.

QUESTION 77

Which three statements are true about DevOps practices in Pega priority. (Choose three)

- * Intermittent delivery is preferred to help plan predictable releases
- * Acceptance criteria helps to focus customer-centric deployment
- * Pega can integrate third-party DevOps tools to promote flexibility
- * DevOps promotes larger releases in shorter development cycles
- * Tests are run before publishing changes to ensure compatibility

QUESTION 78

An internet provider has a quiz that gives customers a recommended internet speed based on their typical internet use. The questions differ based on the selections that the customer makes, for example, whether they are seeking a recommendation for a residence or a business.

Once the customer completes the quiz, how do you determine the recommended internet speed?

- * Configure a decision table
- * Configure a view with the quiz questions
- * Configure a decision tree
- * Configure a process with multiple decision shapes

QUESTION 79

What is the relationship between pyWorkPage and case data?

- * pyWorkPage contains only the data entered by users while creating and processing a case.
- * pyWorkPage contains all the data pages accessed while creating and processing a case.
- * pyWorkPage contains only the data generated by the system while creating and processing a case.
- * pyWorkPage contains all the case data generated while creating and processing a case.

QUESTION 80

A government application provides field placeholder values to help users enter the correct data. The Design Lead has asked you to increase the font size on all field placeholder value components to help visually impaired users.

Which configuration applies the font styling requirement on the field placeholder values in the application?

- * Update the existing Default theme text entry
- * Run a case type that uses the component and change the font on the view
- * Add a new theme text entry to the application theme
- * Upload a new application theme

QUESTION 81

A moving company provides customers with a tool that recommends a moving vehicle based on the number of bedrooms in their current living space and whether they are planning to move heavy furniture like bed frames, mattresses, or couches. Based on the customer inputs, a decision table presents the customer with a recommendation.

Which two configurations do you use together to build the decision table? (Choose Two)

- * Create a column for the recommended moving vehicle.
- * Create rows for the recommended moving vehicle.
- * Create two rows, one for the number of bedrooms and one for whether the customer is moving heavy furniture.
- * Create two columns, one for the number of bedrooms and one for whether the customer is moving heavy furniture.

QUESTION 82
