**NEW QUESTION 25**

What are the recommend tools to enable JDBC logs in SAP hybris? Choose Three correct answers.

- \* ImpEx
- \* Backoffice Administration cockpit
- \* Hybris configuration properties file
- \* Java code
- \* Hybris Administration console (hAC)

#### NEW QUESTION 26

Which properties can you set to use Service Layer Direct? Note: There are 2 correct answers to this question.

- \* Set persistence.legacy.mode to False in core-spring.xml.
- \* Set the sld.enabled modifier to True in the ImpEx file.
- \* Set persistence.legacy.mode to False in the local.properties.
- \* Set persistence.legacy.mode and servicelayer.prefetch to False All in the local.properties.

#### NEW QUESTION 27

In the SAP Commerce cache, how does invalidation work on a product type? Choose Two correct answers.

- \* At cached FlexibleSearch results where product type is included because the result set might have changed
- \* Cached product items updated during the import are invalidated in all connected hybris cluster nodes and are reloaded from the database when it is used next
- \* Cached product items uploaded during the import are invalidated only in the node where the import is running
- \* All cached FlexibleSearch results are invalidated from the query result region because the result set might have changed

#### NEW QUESTION 28

Which cleanup actions can you perform to reduce performance issues related to the props table?

Choose Two correct answers.

- \* Decrease the size of the props table the database. This result the overflowing values being rejected
- \* Remove all the entries from the props table since the content is irrelevant
- \* Remove the CronJobs that are no longer issue. This results in the corresponding log entries being deleted from the props table
- \* Decrease the value of the hmc string modified values size property in the local properties file. This result in the overflowing values

#### NEW QUESTION 29

How do you configure SAP Commerce cluster settings? Choose Two correct answers.

- \* Specify exactly the same cluster settings for each node in the %HYBRIS\_BIN%/config/local properties file
- \* Specify the cluster settings of each cluster node in the %HYBRIS\_BIN%/config/tomcat/conf/server.xml file
- \* Specify the cluster settings in the %HYBRIS\_BIN% /config/local properties file for each cluster node
- \* Specify the cluster node autodiscovery to True in Order to enable the cluster ID autodiscovery.

#### NEW QUESTION 30

How can you avoid bottlenecks in the SAP Commerce Platform? Choose Two correct answers.

- \* Switch off relations ordering to improve the performance of the import and the synchronization
- \* Check the average amount of items per second imported by impEx to validate that the cache size is sufficient
- \* Schedule a regular cleanup of the props table
- \* Avoid using the lazy-loading mechanism when coding in the development phase

### NEW QUESTION 31

You need to run a FlexibleSearchService query to get results without restrictions. To whom do you assign the session? Note: There are 2 correct answers to this question.

- \* Admin user
- \* Any user that does NOT have any restrictions
- \* Anonymous user
- \* Any member of the admin group

### NEW QUESTION 32

In the SAP Commerce cache, how does invalidation work on a product type? Note: There are 2 correct answers to this question.

- \* Cached Product items updated during the import are invalidated in all connected SAP Commerce cluster nodes and are reloaded from the database when it is used next.
- \* All cached FlexibleSearch results where Product type is included are invalidated because the result set might have changed.
- \* Cached Product items updated during the import are invalidated only in the node where the import is running.
- \* All cached FlexibleSearch results are invalidated from the query results region because the result set might have changed.

### NEW QUESTION 33

Which ImpEx headers can you use to update an SAP Commerce item? Choose Two correct answers.

- \* INSERT\_UPDATE UserGroup;UID: locname groups (uid)(mode=append)
- \* INSERT\_UPDATE UserGroup UID [unique=true] locname [lang=en] locname[lang=de] groups (uid) (mode=append0)
- \* INSERT\_UPDATE UserGroup UID [unique=true] locname [lang=en] locname [lang=de] groups (uid) (mode=append)
- \* INSERT\_UPDATE UserGroup UID [unique=true] locname; groups (uid) (mode=append0)

### NEW QUESTION 34

Which benefits does SAP BTP Extensions integration provide? Note: There are 2 correct answers to this question.

- \* A customization layer for SAP Commerce Cloud that depends on the API Registry module
- \* An alternative and independent application to SAP Commerce Cloud based on the backoffice
- \* An analysis layer to capture customer interactions, contexts, and behaviors for future processing

```

- \* Modify the FlexibleSearch query that fetches catalogs to fix the syntax errors
- \* For the missing links between related items in the catalog
- \* Configure the auto reconnect property in the JDBO properties to reconnect to the database automatically
- \* Increase the number of connections in the pool if the current number is NOT sufficient

### NEW QUESTION 40

How are bug fixes provided to partners and customers?

- \* SAP Commerce delivers small jar archives called Hot Fix for the extension that fixes a specific bug.
- \* SAP Commerce provides an extension that contains bug fixes.
- \* SAP Commerce provides SAP Notes with code corrections describing the best way to fix a specific bug.
- \* SAP Commerce provides a patch release that contains only bug fixes and security patches.

#### NEW QUESTION 41

What must you do when you provide a workaround for a code glitch in an existing service, for example, ProductService?Note: There are 3 correct answers to this question.

- \* Modify the existing bean definition with the new service.
- \* Add a new bean definition with a new ID for the new service.
- \* Implement a new custom service by extending the existing service.
- \* Override the alias of the original bean definition.
- \* Replace all injections with a new ID for the new service.

#### NEW QUESTION 42

What are some of the benefits of using Service Layer Direct?Note: There are 3 correct answers to this question.

- \* It allows you to read data from and write data to the database.
- \* It bypasses the Jalo layer completely to persist data in the database.
- \* It works for global sessions and for current sessions.
- \* It combines the Jalo layer and service layer.
- \* It bypasses the interceptors to persist data in the database.

#### NEW QUESTION 43

A customer reports an error provider the following snippet of log file INFO [jvm 1 | srvmain 2013/11/15

```
21:36:38:839| ERROR [ImpexWorker<1/4>] (000000RS-impEx-import) [Multi threadeddimpEximportReader] line 11 at  
man script script
```

```
&#8230;Com.microsoftsqlserver.jdbc.SQLServerExceptionViolation of PRIMARY KEY constrained  
PK_3819157796645776966 Cannot insert duplicate key in object  
&#8230;(8796126019588) INFO [jvm 1| seviman | 2013/11/15.21.36.38876| de.hybris  
platform.jaloSystemException.com. Microsoft sqlserveridbc.SQLServerException. Violation of PRIMARY KEY  
&#8230; &#8216;PK_3819157796645776366 Cannot insert duplicate key in object dbo.users. The  
duplicate key value is (3796126019588)[hy-1]. What could be the root cause of the error? Choose Two correct answers.
```

- \* The current PK sequence value is corrupt
- \* A primary key is used in the database instead of a unique index
- \* The database engine verifies that the key is NOT unique and reports an exception
- \* SAP Commerce verifies that the key is NOT unique and reports an exception
