Pass SAP Certified Development Associate C-CPE-14 exam [Dec 14, 2023] Updated 144 Questions  
SAP C-CPE-14 Actual Questions and 100% Cover Real Exam Questions

SAP BTP Extension Developer certification exam measures the ability of the candidate to create and maintain cloud native applications in the SAP Cloud Platform environment, utilizing SAPUI5, SAP Cloud SDK, and SAP Cloud Application Programming Model.

**NO.21** Which of the following statements about a GitHub Repository are correct? Choose the correct answers.

- \* Anyone on the internet can commit into a public repository.
- \* You choose who can see your private repository.
- \* You choose who can commit into your private repository.
- \* Anyone on the internet can see a public repository.

**NO.22** What are the two structures JSON is built on? Choose the correct answers.

- \* Collections of name/value pairs

- \* Collections of value/value pairs
- \* Ordered list of values
- \* Unordered list of strings

**NO.23** What is required when registering an SAP S/4HANA Cloud system in your SAP BTP global account? Choose the correct answer.

- \* A developer
- \* A coin
- \* A token
- \* A voucher

**NO.24** Role collections of a global account are available in a subaccount of this global account?

Determine whether this statement is true or false.

- \* true
- \* false

**NO.25** What can you do to provide meaningful error messages to users in your CAP application? Choose the correct answer.

- \* Catch exceptions.
- \* Hide the cause of errors.
- \* Register an error handler.
- \* Register an event handler.

**NO.26** Role collections of a subaccount are available in the global account. Determine whether this statement is true or false.

- \* true
- \* false

**NO.27** At what level can you select a region?

- \* Directory
- \* Global account
- \* Subaccount
- \* Environment

**NO.28** In the SAP BTP cockpit, where can you assign role collections to users? Choose the correct answer.

- \* Security -? Roles
- \* Security -? Users

**NO.29** What kind of request does the webhook send? Choose the correct answer.

- \* POST
- \* PUT
- \* GET

**NO.30** Which files do you modify to store project configurations? Choose the correct answers.

- \* passport.js
- \* .cdsrc.json
- \* package.json

**NO.31** How many event handlers can you register for one event phase?

- \* exactly one
- \* exactly three

\* multiple

**NO.32** Your CAP project contains an entity called Books. You want to extend the Books entity with the managed aspect. You have already imported the aspect from the `@sap/cds/common`; package (see attached graphic). Which is a valid way to extend the entity with the aspect?

```
using {managed} from '@sap/cds/common';

entity Books {
  key ID;
  title: String;
  author: String;
}
```

- \* Image 1
- \* NA

**NO.33** You use the Cloud MTA Build Tool to create an MTA archive (.mtar) from your project source. What command must you run to do this in one step?

- \* mbt build
- \* mbt init
- \* mbt make

**NO.34 DRAG DROP**

You have implemented a simple bookshop CAP application for the purpose of selling books. You want to implement an event handler in the bookshop-service, that calculates a discount of 10 % on the price of books written in English (en). In all other cases, you want to calculate a discount of 5 %. The price should be calculated after books are read from the service. Drag the code snippets from below into the correct parts of the event handler implementation. Drag the key and value items from below into the correct parts of the descriptor file.

```
cds.serve( ) .with (function(){
  this. ( , 'books', (books)=>{
    books. ((book) =>{
      if ( ) {
      } else {
      }
    }
  });
```

'bookshop-service'	book.price = book.price * 0.95			
book.price = book.price * 0.9	forEach	after	'READ'	book.language == 'en'

bookshop-service, after, READ, forEach, book.language == en, book.price = book.price \* 0.95, book.price = book.price \* 0.9

**NO.35** What are some characteristics of CAP event handling? Note: There are 2 to choose.

- \* You can register only one event handler for a specific event.
- \* You must use the handler registration API `srv.emit(<event>)` to de-register event handlers.
- \* You can register event handlers with instances of `cds.service` to add custom logic.
- \* You can register multiple event handlers for each event phase.

**NO.36** When using namespaces, what does SAP recommend you use to construct names for namespaces?

- \* Cascades of acronyms
- \* Your organization's name
- \* Reverse domain names

**NO.37** Which of the following statements applies to Continuous Deployment? Choose the correct answer.

- \* Code changes are pushed to a remote source code management system.
- \* Feedback from a productive system gets quickly integrated into teams' backlog.
- \* The trigger for deployment to a productive system is a human decision.
- \* Software is ready for deployment to a productive system all the time.
- \* Deployment to a productive system is triggered automatically.

**NO.38** You use SAP Continuous Integration and Delivery for your CAP project. Where can you access the Webhook Event Receiver?

- \* On the Repositories tab
- \* On the Jobs tab
- \* On the Credentials tab

**NO.39** Which web browsers are officially supported in SAP Business Application Studio? Note: There are 2 to choose.

- \* Google Chrome
- \* macOS Safari
- \* Mozilla Firefox
- \* Microsoft Edge

**NO.40** Within SAP CI/CD jobs you can: Choose the correct answer.

- \* Monitor the successful creation of your builds.
- \* Delete deployed applications directly from your Cloud Foundry environment space.

**NO.41** You use SAP Continuous Integration and Delivery for your CAP project. Where can you access the Webhook Event Receiver?

- \* On the Credentials tab
- \* On the Jobs tab
- \* On the Repositories tab

**NO.42** What are some principles of continuous integration? Note: There are 2 to choose.

- \* Automated tests
- \* Automated deployment to the productive system
- \* Automated builds
- \* Automated code change pushes
