

The Realest Study Materials H12-811-ENU Dumps Updated May 13, 2024 [Q348-Q364]

The Realest Study Materials H12-811-ENU Dumps Updated May 13, 2024
LATEST H12-811-ENU Exam Practice Material

Huawei H12-811-ENU (HCIA-Datacom V1.0) Certification Exam is a professional-level certification exam offered by Huawei Technologies Co. Ltd. It is designed for individuals who want to validate their skills and knowledge in the field of data communication. H12-811-ENU exam is targeted at individuals who have a basic understanding of data communication principles and technologies and want to advance their career in this field.

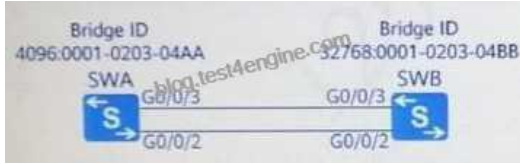

NO.348 Which of the following options describes the concept of the IEFV architecture correct? ()*

- * MANO is composed of NFVO.VNFN and VIM.
- * VFM. Virtual network function management, responsible for the life cycle management of VNF.
- * VIM (Virtualised Infrastructure Manager) virtual resource management, responsible for the virtualization of infrastructure.
- * NFVO (NEV Orchestrator). Responsible for business orchestration.

NO.349 Telnetlib is a module that implements the Telnet protocol that comes with Python.

- * True
- * False

NO.350 The two switches shown in the figure below have both enabled the STP protocol. Which port will eventually be in the Blocking state? ()

- * SWA's G0/0/3 port
- * SWA's G0/0/2 port
- * G0/0/2 port of SWB
- * G0/0/3 port of SWB

NO.351 After a fault occurs in the network, the administrator finds that the configuration of a certain router has been modified through troubleshooting. What measures should the administrator take to avoid this situation from happening again? ()*

- * The administrator should configure ACL to control that only the administrator can log in to the device
- * The administrator should enable port-security on the routed management port
- * The administrator should configure AAA. to authenticate and authorize users who log in to the device
- * The administrator should configure the permission level of all accounts except the administrator to log in to the device as

NO.352 Trunk ports can allow multiple VLANs to pass, including VLAN4096.

- * True
- * False

NO.353 The MAC address table of existing switches is shown in the figure. Which of the following statements are correct? ()
(Single-choice question)

```
Switch#display mac-address
MAC address table of slot 0:
MAC Address      VLAN#  PVID/PV  PVID/PV  Port          Type      LSP/VLAN-ID
MAC-Forwarding
5489-9811-0b49  1      -        -        -             static   -
Total waiting items on slot 0 displayed = 1
Switch#display mac-address
MAC address table of slot 0:
MAC Address      VLAN#  PVID/PV  PVID/PV  Port          Type      LSP/VLAN-ID
MAC-Forwarding
5489-989d-1d30  1      -        -        Eth0/0/1     dynamic  0/1
5489-9885-18a8  1      -        -        Eth0/0/2     dynamic  0/1
Total waiting items on slot 0 displayed = 2
```

- * The MAC address 5489-9811-0b49 is manually configured by the administrator
- * The MAC address 5489-989d-1d30 is manually configured by the administrator
- * After the switch restarts, all MAC addresses need to be relearned. The MAC address 5489-9885-

18a8 is manually configured by the administrator

- * The MAC address 5489-9885-18a8 is manually configured by the administrator

NO.354 Management Information Base (MIB) Information Base) is a virtual database, this database only exists on NMS. ()

- * True
- * False

NO.355 Network equipment running the SNMP protocol can take the initiative to report alarm information so that network administrators can find faults in time. ()

- * True
- * False

NO.356 ip route-static 10.0.12.0 255.255.255.0 192.168.1.1, which description about this command is correct?

- * This command configures a route to the 10.0.12.0 network
- * The priority of this route is 100
- * If the router learns a route with the same destination network as this route through other protocols, the router will prefer this route
- * This command configures a route to the 192.168.1.1 network

NO.357 Which of the following statements about RA and RS in IPv6 are correct? (Multiple Choice)

- * RS is used to reply address prefix information
- * RA is used to request address prefix information
- * RS is used to request address prefix information
- * RA is used to reply address prefix information

NO.358 UDP cannot guarantee the reliability of data transmission, and does not provide the functions of message sequencing and flow control. It is suitable for flows with low transmission reliability requirements but high transmission speed and delay requirements. ()

- * True
- * False

NO.359 In the campus network, the reliability of the network can be improved by using link aggregation and stacking technology. ()

- * True
- * False

NO.360 OSPF protocol needs to elect DR and BDR in which of the following network types? ()*

- * Point-to-multipoint
- * NBMA
- * Point-to-point type
- * Broadcast type

NO.361 The broadcast address is a special address that all the host bits in the network address are set to, and it can also be used as a host address. ()

- * True
- * False

NO.362 Compared with STP, which of the following port roles are newly defined in RSTP? (Multiple choice)

- * Designated port
- * Root port
- * Alternate port
- * Backup port

NO.363 The following description of static and dynamic routing is wrong ().

- * Dynamic routing protocols take up more system resources than static routing protocols.
- * After the link fails, the static route can automatically complete the network convergence.
- * After the administrator deploys the dynamic routing protocol in the corporate network, later maintenance and expansion can be more convenient

* Static routing is easy to configure and easy to manage when applied in the enterprise

NO.364 Apply the ACL configured in the figure in Telnet. Only the device with the IP address of

172.16.105.2 is allowed to log in remotely: ()#acl number 2000 rule 5 permit source

172.16.105.20#

* True

* False

To prepare for the Huawei H12-811 certification exam, candidates can avail themselves of various training courses and study materials offered by Huawei. HCIA-Datacom V1.0 certification exam is rigorous and requires a solid understanding of data communication technologies, so it is recommended that candidates take the time to prepare thoroughly before attempting the exam.
