Ace SAP C_SIGDA_2403 Certification with Actual Questions Nov 17, 2024 Updated 2024 The Most Effective C_SIGDA_2403 with 95 Questions Answers

SAP C_SIGDA_2403 Exam Syllabus Topics:

TopicDetailsTopic 1- SiGNAL: This topic explains how to use SiGNAL as query language. It also discusses how process data and analyze it in more depth.Topic 2- Business Process Management: There are different areas of business process management. This topic explains those areas and also discusses the process levels and its architecture.Topic 3- Process Mining: Its primary focus is discussing fundamentals of process mining. Furthermore, the topic explores pointing out the basic data requirements in process mining projects.Topic 4- SAP Signavio Process Insights: The topic gives insights into SAP Signavio Process.Topic 5 - SAP Signavio Process Collaboration Hub: By covering this topic, you learn how to navigate through different process information and collaborate with other business users. Lastly, the topic delves into this navigation to share feedback on process content.Topic 6- SAP Signavio Process Intelligence: To explore and analyze a data set, this section discusses creating an investigation. It also discusses revealing inefficiencies in the process.

NEW QUESTION 44

How can administrator rights be granted to a new user within SAP Signavio Process Manager?

* Create an Administrators user group and assign the respective person to this group.
* Create a user account and assign it to the Administrators user group.
* Create a user account and assign the access right “administrator”.
* Create a support ticket with SAP to request the full admin rights for a specific user.

NEW QUESTION 45

What is a Variant in Process Mining?

* A variant is a set of cases with the same sequence of tasks.
* A variant is a set of attributes.
* A variant visualizes all tasks to complete the process.
* A variant has different process flows.

NEW QUESTION 46

Which of the following Widgets need to be linked to a process model to provide insights?Note: There are 3 correct answ-ers to this que-stion.
C.D.E

NEW QUESTION 47

What is the purpose of Workflow Management Systems?

* To onboard new employees
* To provide reports on business problems
* To collect data on employee operations
* To simplify reoccurring procedures through delegation

NEW QUESTION 48

How does the splitting Inclusive Gateway (OR) work?Note: There are 2 correct answ-ers to this que-stion.
A.C

NEW QUESTION 49

What are the benefits of using a data model in the ETL Data Pipeline configuration?Note: There are 2 correct answ-ers to this que-stion.
A.B

NEW QUESTION 50

What is the benefit of the Over Time Widget?

* It visualizes how KPI’s are calculated in a certain timeframe.
* It visualizes the variants of a period.
* It visualizes selected case attributes for a given period.
* It visualizes the process flow in a certain timeframe.

NEW QUESTION 51

What are use cases for a Parallel Gateway?Note: There are 2 correct answ-ers to this que-stion.
* Ensure that at least one task is completed before proceeding with the next.
* Assign different tasks at the same time.
* Ensure that unassigned tasks can be skipped.
* Ensure that all tasks are completed before proceeding with the next.

NEW QUESTION 52

What are some benefits of the comment function in the SAP Signavio Process Collaboration Hub?Note: There are 2correct answers to this question.
* Include all employees in process performances and reviews.
* Edit and publish processes immediately.
* Optimization can be achieved much faster.
* Add relevant attributes directly through the comment function.
The comment function within the SAP Signavio Process Collaboration Hub offers several benefits, primarily aimed at enhancing collaboration and optimization. Firstly, it allows for the inclusion of all employees in process performance reviews and discussions, thereby fostering a culture of continuous improvement and engagement across the organization. Secondly, optimization processes can be significantly accelerated as feedback andsuggestions are gathered and acted upon swiftly. This function does not, however, directly enable users to edit and publish processes (which is more aligned with the administrative rights within the tool) or to add relevant attributes directly through the comment function, as attributes are typically managed within the process modeling environment.References:SAP Signavio Documentation

NEW QUESTION 53

What are the benefits of running a syntax check of your process?Note: There are 2correct answers to this question.
* It ensures the correct order of tasks.
* It ensures consistency of the process model.
* It shows all bottlenecks in a process.
* It verifies that the used BPMN elements are set correctly.
Running a syntax check of your process in SAP Signavio or similar BPMN modeling tools offers several benefits, including:

* Option B (It ensures consistency of the process model):Syntax checks help verify that the modeling conventions and rules are consistently applied across the process model, ensuring that the process is logically structured and easily understandable.

* Option D (It verifies that the used BPMN elements are set correctly):The syntax check function validates the correct use of BPMN elements according to the BPMN standard, ensuring that the process diagram accurately represents the intended process flow and that all elements are correctly connected and configured.

NEW QUESTION 54

What are some benefits of using metrics in SAP Signavio Process Intelligence?Note: There are 2 correct answ-ers to this que-stion.
B.D

NEW QUESTION 55

What is the benefit of using Exclusive Gateways (XOR) in a process flow?

* Allows to trigger as many paths as required, based on a condition
* Allows to skip all paths
* Allows to trigger a certain process path, based on a condition
* Allows to trigger multiple paths simultaneously, based on a condition

NEW QUESTION 56

How can administrator rights be granted to a new user within SAP Signavio Process Manager?

* Create an Administrators user group and assign the respective person to this group.
* Create a user account and assign it to the Administrators user group.
* Create a user account and assign the access right “administrator”.
* Create a support ticket with SAP to request the full admin rights for a specific user.

To grant administrator rights to a new user within SAP Signavio Process Manager, the correct approach is to:

* Option B (Create a user account and assign it to the Administrators user group):Users are granted different levels of access and rights based on their group memberships. By creating a user account and then assigning that account to the Administrators user group, the user inherits the rights and privileges associated with that group, including administrative capabilities.

NEW QUESTION 57

Which fields can be used in forms within SAP Signavio Process Governance?Note: There are 3correct answers to this question.

* Document template
* Yes / No checkbox
* JavaScript
* File
* Text

In SAP Signavio Process Governance, forms are used to collect data or display information as part of a workflow. The fields that can be used in these forms include:

* Option B (Yes / No checkbox):This field type allows users to answer a question with a binary choice, making it straightforward for decision-making or confirming a condition within the workflow.

* Option D (File):The file field enables users to upload files as part of the form submission. This can be useful for attaching documents, images, or other relevant files that are pertinent to the workflow step.

* Option E (Text):The text field allows users to enter free-form text. This can be used for descriptions, comments, or any other information that requires text input.

These field types enhance the versatility and functionality of forms in SAP Signavio Process Governance, enabling the collection of various types of data and user inputs as part of process workflows.

NEW QUESTION 58

How can you capture relevant process tasks in a table-based approach?
* Use Graphical Editor
* Use Process Documentation Template
* Use Process Reporting
* Use QuickModel

NEW QUESTION 59

Which are the main aspects of filters in SAP Signavio Process Intelligence?Note: There are 2 correct answ-ers to this que-stion.
A.D

NEW QUESTION 60

Which of the following areas are part of the lifecycle of a business process?Note: There are 3correct answers to this question.
* Process Documentation
* Process Risk Management
* Process Analysis
* Process Execution
* Process Approvals
The lifecycle of a business process encompasses various stages, including Process Documentation, Process Analysis, and Process Execution. Process Documentation involves the detailed recording and description of the process steps, roles, and rules, serving as a foundation for understanding and improving processes. Process Analysis is the examination of processes to identify inefficiencies, bottlenecks, and opportunities for improvement. Process Execution refers to the actual carrying out of the process steps, where the effectiveness of the process is tested in real-world scenarios. These stages are integral to the continuous improvement cycle of business process management, ensuring processes are well-understood, optimized, and effectively executed.

Process Risk Management and Process Approvals, while important aspects of managing processes, are not explicitly listed as stages in the typical lifecycle of a business process as described in BPM literature.
